TABLE OF CONTENTS

GROUND CONTROL APPROACH XI
AIR NAVIGATION RADIO AIDS AND AIRPORT DATA, LEGEND ..... XII - XIII
FLIGHT PLANNING CHARTS AND DATA PAGES ..... 1 - 143
V.H.F. RANGE CHARTS ..... 144 - 146
AIRWAY MILEAGES 147
NOTICES TO AIRMEN 148

GUIDE CONTENTS

THE AIRMAN'S GUIDE IS A COMPOSITE DIRECTORY OF AIRPORTS, AIR NAVIGATION RADIO AIDS, AND NOTICES TO AIRMEN. ON THE DATA PAGES ARE TABULATED ALL THE DATA COVERING THE FACILITIES CHARTED ON THE BACKING PAGES. THIS PRESENTATION IS GRADUALLY BEING REVISED, HOWEVER, SO THAT EVENTUALLY THE DATA PAGES WILL FACE THE CHARTS.

INDEX OF FACILITIES

TO FIND THE NUMBER OF THE PAGE ON WHICH A FACILITY IS CHARTED, REFER TO THE INDEX OF FACILITIES BELOW. AS OUTLINED ABOVE, THE DETAILED DATA FOR THE FACILITY WILL BE FOUND ON THE DATA PAGE BACKING, OR FACING, THE CHART.

NEW DATA PRESENTATION

(A) ON THE DATA PAGES BACKING OR FACING THE CHARTS, NEW DATA OR REVISIONS ARE INDICATED BY ARROWS; (B) IN THE NOTICES TO AIRMEN SECTION, CITATIONS COVERING NEW OR REVISED RADIO DATA ARE PREFIXED BY ONE LARGE STAR " ★ " CITATIONS COVERING NEW OR REVISED AIRPORT, OR MISCELLANEOUS DATA ARE PREFIXED BY TWO ASTERISKS "**"

DATA PAGE NOTAMS

BECAUSE OF THE SERIOUS PAPER SHORTAGE, THE DATA PAGES, WHERE POSSIBLE, HAVE TO SERVE AS NOTAM (NOTICES TO AIRMEN) PAGES. RESULTANTLY, MOST OF THE NEW DATA FORMERLY NOTAMIZED IN THE NOTICES TO AIRMEN SECTION WITH PREFIXED LARGE STARS OR DOUBLE ASTERISKS ARE NO LONGER CARRIED IN THAT SECTION. ONLY COMMISSIONINGS, ABANDONMENTS, OR CHANGES SO POTENTIALLY HAZARDOUS THAT THEY ARE INDICATED WITH Ⓡ (FOR RED FLAG) SYMBOLS ON THE CHARTS, ARE NOW CITED IN THE NOTICES TO AIRMEN SECTION NOTAMIZING ON THE DATA PAGES IS EFFECTED BY THE USE OF PREFIXED ARROWS AS IN THE FORMER AIR NAVIGATION RADIO AIDS PUBLICATION. ANY CHANGES FROM THE PREVIOUS ISSUE, WHETHER CITED IN THE NOTICES TO AIRMEN SECTION, OR NOT, ARE INDICATED BY THE PREFIXED ARROWS. FOLLOWING ARE EXAMPLES OF CHANGES NOTAMIZED ONLY ON THE DATA PAGES: FIELD OBSTRUCTION, SERVICING, ELEVATION, LOCATION, AND RUNWAY LENGTH CHANGES BECAUSE OF THE USE OF THE PREFIXED ARROWS AS NEW DATA INDICATORS, A FURTHER INNOVATION HAD TO BE ADOPTED THIS IS A TINTED HORIZONTAL LINE FOLLOWING THE LAST TABULATED FACILITY AND TITLED EITHER NEW RADIO FACILITIES OR NEW AIRPORTS.

HOW TO USE THE AIRMAN'S GUIDE

NEW FACILITIES ON DATA PAGES

SPACE BELOW THE TINTED HORIZONTAL LINES ON THE DATA PAGES HAS BEEN RESERVED AS A SUPPLEMENT FOR NEW RADIO AIDS AND AIRPORTS WHOSE DATA WERE RECEIVED AFTER THE DATA PAGES WERE ORIGINALLY TYPED. REVISIONS TO EXISTING AIRPORTS AND RADIO AIDS ARE SUPER-IMPOSED ON THE OLD DATA. NEW AIRPORTS AND RADIO AIDS HOWEVER, ARE LISTED, NECESSARILY OUT OF ALPHABETICAL ALIGNMENT, BELOW THE TINTED HORIZONTAL LINES UNTIL THE PAGE IS RE-TYPED.

CHART NOTAMS

NOTAMIZING ON THE CHARTS IS EFFECTED BY USE OF THE SUPERIMPOSED Ⓡ AND Ⓞ SYMBOLS. THE Ⓡ (FOR RED FLAG) INDICATES A VERY HAZARDOUS CONDITION OR A MAJOR CHANGE. THE Ⓞ SYMBOL (FOR ORANGE FLAG) INDICATES A MINOR CHANGE OR HAZARDOUS CONDITION WITH THE FACILITY STILL USABLE WITH CAUTION. THE PERTINENT DETAILS TO WHICH THESE SYMBOLS REFER WILL BE FOUND LISTED IN THE NOTICES TO AIRMEN SECTION UNDER THE FACILITY NAME (AND STATE) BY WHICH THEY ARE CHARTED.

Ⓡ and Ⓞ SYMBOLS

THESE SYMBOLS WERE ADOPTED FOR SUPER-IMPOSITION OVER CHARTED FACILITIES TO INDICATE HAZARDOUS CONDITIONS AND COVERING NOTICES TO AIRMEN. THUS, IF A CHART USER NOTES NO SYMBOL ON THE FACILITIES HE IS PLANNING ON USING, THERE IS NO NECESSITY FOR HIM TO WADE THROUGH THE 30-ODD PAGE NOTICES TO AIRMEN SECTION

NOTICES TO AIRMEN SECTION

ALL TEMPORARY CONDITIONS (FIELD SOFT, RUNWAY UNDER CONSTRUCTION, RANGE COURSE OUT OF ALIGNMENT, ETC) ARE CITED IN FULL IN THE NOTICES TO AIRMEN SECTION UNTIL THEY ARE NO LONGER IN EFFECT. WHEN A CITATION CARRIES A PERMANENT ITEM AND A TEMPORARY ITEM, THE PERMANENT ITEM IS UNDERLINED. PARENTHETICAL DATE AT END OF ITEM INDICATES TIME ITEM WAS REPORTED. TO CONFORM TO CHART PRACTICE, ALL FACILITY DATA ARE LISTED IN THE NOTICES TO AIRMEN SECTION AND ON DATA PAGES ALPHABETICALLY BY STATES AND BY FACILITY NAME. THUS, AN AIRPORT WILL BE FOUND LISTED ALPHABETICALLY UNDER ITS OWN NAME RATHER THAN UNDER ITS LOCALE'S NAME. IF THE AIRPORT OR RADIO FACILITY NAME IS OTHER THAN THAT OF THE CITY IN WHICH IT IS LOCATED, THE LOCATION IS SHOWN IN PARENTHESIS AFTER THE FACILITY NAME.

SPECIAL NOTICES

NOTICES OF NATIONAL INTEREST, OF GREAT IMPORTANCE, OR OF NON-LOCALIZED NATURE, WILL BE FOUND AT THE BEGINNING OF THE NOTICES TO AIRMEN SECTION.

CIVIL FACILITY CHANGES: ADVISE WHOM

PLEASE ADVISE THE OFFICE OF AVIATION INFORMATION, ATTENTION A-260, C.A.A., DEPARTMENT OF COMMERCE, WASHINGTON 25, D.C. AS SOON AS TEMPORARY CONDITIONS COVERING CIVIL AIRPORTS OR NAVIGATIONAL AIDS BEGIN OR TERMINATE, OR FLIGHT HAZARDS ARE ERECTED OR REMOVED. FIELD DATA REVISIONS SHOULD BE SUBMITTED TO THE NEAREST C.A.A. DISTRICT AIRPORT ENGINEER.

TO ALL SUBMITTERS OF AIRMAN'S GUIDE DATA

AN UNDER-MANNED STAFF PREVENTS AN INDIVIDUAL ACKNOWLEDGMENT OF DATA SUBMITTED FOR THE AIRMAN'S GUIDE BY TELEGRAM, TELETYPE DESPATCH, OR LETTER. YOUR COOPERATION IN PERMITTING A GUIDE CITATION TO SUFFICE AS AN ACKNOWLEDGMENT WILL BE APPRECIATED.

INDEX OF FACILITIES

LEGEND

A - AIRPORT WITH AN ASSOCIATED RADIO FACILITY IDENTICALLY NAMED
FM - FAN MARKER
H - NON-DIRECTIONAL RADIO BEACON
R - RADIO RANGE
T - AIRPORT WITH CONTROL TOWER

N.B. ALL FACILITIES WITHOUT A LETTER SUFFIX ARE AIRPORTS. NAMES NOT FOLLOWED BY A NUMBER SUFFIX ARE NOT AIRPORTS BUT MERELY GEOGRAPHICAL LOCATIONS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aricraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NAVY GROUND CONTROLLED APPROACH (GCA): Universal **frequencies allocated** primarily for Navy GCA operational **use**, transmitting **and receiving, are as follows:**

HF Communications: 3475,4890,6640 kcs.

VHF Communications: 134.64,142.02,143.64 mcs.

Navy GCA Units shall **be prepared to control aircraft on** the **interim** U.S. emergency **frequency,** 140.58 **mcs, transmit and receive. Use of this frequency should be** restricted **to emergencies and routine check of communication equipment.**

In addition to above, Navy GCA Units will be prepared to transmit on HF from 2000 to 18100 kcs, and receive on 1500 to 9050 kcs to aid any plane in emergency.

To promote flight safety, the Navy Department has made its GCA facilities available **to civil aircraft for emergency use. Practice approaches by civil aircraft is restricted to multi-engine aircraft because of personnel and equipment limitations. Navy GCA Units shall be prepared to control scheduled aircarriers in emergencies on 140.58 mcs and 3117.5 kcs, transmit and receive. In addition arrangements shall be made to transmit GCA control instructions on tower low frequency either directly or by relay** through **the tower to aircraft in distress and not able to receive on any other frequency.**

Call signs for all Navy GCA Units are the name of the field plus "GCA". Example: "Norfolk GCA".

ARMY GROUND CONTROLLED APPROACH (GCA): (a) CONTACT: Pilots requiring GCA assistance should call the associated control tower requesting instructions for working GCA. Example: "Andrews Tower, this is Army 5555, request GCA". (b) TOWER **INSTRUCTIONS:Control towers will ascertain frequencies available to both** pilot and **GCA, advise the pilot and establish contact with the GCA unit. Example: "Army 5555, this is Andrews Tower, do you have channel G, over". "Andrews Tower, this is Army 5555, channel G available, over". "Army 5555, this is Andrews Tower, establish contact with GCA on channel G, out". "Andrews GCA, this is Army 5555, over". "Army 5555, this is Andrews GCA, your position is now etc.....". (c) EMERGENCY: When receiver and transmitter difficulties exist, the tower may relay Ground Controlled** Approach **instructions to the pilot. However, from a safety standpoint the procedure** should **be used as an emergency contingent only. (d) ALERTING GCA: After being inoperative, GCA units require approximately 20 to 30 minutes for warming up. Pilots should anticipate requirement for GCA in flight planning and request alerting of GCA units as far in advance as possible.**

C.A.A. GROUND CONTROLLED APPROACH (GCA): The C.A.A. has control tower-operated GCA units at Washington National Airport, Chicago Airport. The Indianapolis GCA unit is not remoted to the tower. **The La Guardia Field unit will be commissioned in the immediate future.** The C.A.A. installations, however, are operating on a service test or experimental basis only, and for operator training, and can be used only for practice approaches and landings until further notice. No emergency landing service is available until these units are officially commissioned.

(4) - Station guards 3105, 4495, 6210, 3117.5 kcs.
(7-24) - Hours of operation (7 A M. to midnight) on a 24-hour clock basis
→ - New or revised data*

RADIO CLASS DESIGNATIONS

AC.....Approach Control Tower, CAA
B.....Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited)
C.....Control Tower, CAA
CA.....Control Tower, Army
CI.....Control Tower (City,County,Private, etc.)
CN.....Control Tower, Navy
D.....Distantly controlled
FM.....VHF fan type marker (100 watts)
FMHW.....Non-directional radio beacon when combined with fan marker.
GCA.....Ground control approach system
H.....Non-directional radio-beacon (homing), power 50 watts or more
ILS.....Instrument Landing System (voice on localizer channel)
IM.....VHF boundary marker
LFM.....VHF fan type marker, low powered (5 watts not over 10 miles from range)
MH.....Non-directional radio-beacon (homing), power less than 50 watts
ML.....Range (loop radiators), power less than 50 watts.
MM.....VHF middle marker
MMK.....Compass locator station when combined with middle marker of Instrument Landing System
MRA.....Range (adcock, vertical radiators), power more than 50 less than 150 watts
MRL.....Range (loop radiators), power more than 50 less than 150 watts
OM.....VHF outer marker
OMK.....Compass locator when installed at outer marker site or within 5,5 miles of middle marker
P.....Point to point radio
RA.....Range (adcock, vertical radiators), power 150 watts or more
RL.....Range (loop radiators), power 150 watts or more
S.....Simultaneous (range signals and voice) type of transmitter
T.....Teletype
TX.....Principal teletype
V.....Additional voice feature on VHF
VAR.....Visual-aural VHF range (every VAR has simultaneous voice feature)
W.....Without voice facilities
Z.....VHF station location marker at a range station

N.B. Variation is computed at the station. The distance from station to field is computed from the center of the range station to the nearest edge of the usable area of the airport. The bearing is that from the range station to airport or fan marker.

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radiobeacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Class MH stations operate on request unless otherwise cited. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

* AT THE BOTTOM OF THE LAST COLUMN, UNDER THE HEADING OF NEW RADIO FACILITIES, BORDERED BY TINTED LINE WILL BE FOUND, OUT OF ALPHABETICAL ALIGNMENT, ALL THE NEW RADIO FACILITIES TABULATED AFTER THE TYPE FOR THAT PAGE HAD BEEN ORIGINALLY SET UP.

N.B. For Digest of A.T.C. and Communications Procedures, see *FLIGHT INFORMATION MANUAL*

AIRPORT DATA
LEGEND

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A)	Airport name	(A) -	Owned or leased totally by Army
(N)	"	(N) -	" Navy
(CG)	"	(CG)-	" Coast Guard*
(NG)	"	(NG)-	" National Guard
(A)	"	-	Open to civilians but owned or leased wholly or in part by Army, Air Reserve, Army svcg. detach. or contract ops usually available.
(N)	"	-	Open to civilians but owned or leased wholly or in part by Navy.
(CG)	"	-	" Coast Guard.
(G)	"	-	" WD or State Govt, for Air Nat'l Guard. Ltd svcg. and main. for transient military acft.
(P)	"	-	Civil airport opened to military acft. (See Note 3)
(E)	"	-	CAA Intermediate Field

CLASS

SIZE

4h: Length of longest landing strip (unpaved) in hundreds of feet
4h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited and indicated as "unl")

N.B. Only the length of the longest runway is cited, and its direction is not indicated. Space restrictions occasioned this policy, but logic justified it. The logical assumption may be made that runways have been laid out in accordance with the local wind rose. Therefore, in all calms, or gentle-ranging winds, or winds aligned with the longest runway, the longest runway will be used. When a wind not aligned with the longest runway is of such intensity that the longest runway cannot be used, this wind makes the use of runway aligned with the wind, even though much shorter than the longest runway, sufficiently long from a safety viewpoint. Two, prior knowledge that there is, for example, a NW/SE runway is of little value to a pilot if, when he arrives over the field the wind is blowing too strongly from another direction to use that runway. Finally, the larger the number indicating the longest runway length, the greater is the assurance of a sufficient number of runways for all-wind coverage.

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L1: Incomplete lighting, either flood or portable runway lights
L2: Beacon only
L3: Beacon and boundary
L4: Beacon, boundary, and obstruction
L5: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and major engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.
These fields are often recognizable by airport class, comparable to, for example, "1S S1" "1S S1" suggests that the field is not too large, and that the field may not have a full-time attendant even though fuel is stored there Lack of radio or lighting facilities, indicated by the absence of an "R" or "L" in the airport class, is a further indication that a full-time attendant may not be available. Absence of an "S" (servicing) indicates definitely that fuel, if available at all, is available only by truck from town. Any field carrying no indication of radio (R), lights (L), or servicing (S) in airport class column should be used with caution, especially a field of the small category. Fields of this nature may be inactive or not maintained, and thus dangerous for use.

NOTES

1 "(NC)" not charted. Indicates not charted because of insufficient data or inability to verify
2. → New or revised data. *
3. "(P)" in CITY-AIRPORT NAME column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the War Department.
4 "Effingham Int., 10, LS-ID" in CITY-AIRPORT NAME column indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no prefixed star or "Int."
5. In Location column, the word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
6. In Remarks column:
(a) "91 oct.", indicates fuel octane available. "Army", or "Navy" following octane indicates Army or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency
(c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway.
(d) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned (See Special Notice).
(e) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available Such fields may be used by military aircraft, however, only commercial service is available.
(f) "PRIVATE" indicates field is available for owner only, and not to be used by others except in emergency Only those private fields that are clearly identifiable from the air as airports are listed. Thus many personal use fields are not covered in the Guide because they are not marked or are too small
(g) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(h) "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter It must be remembered that most fields do not have 24-hour operation Accordingly the field lights, indicated for such a lighted field (and, in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(i) "FEE" indicates landing fee for private aircraft
7. Airline stop airport names are capitalized or bracketed

FLIGHT PLANNING CHARTS

LEGEND

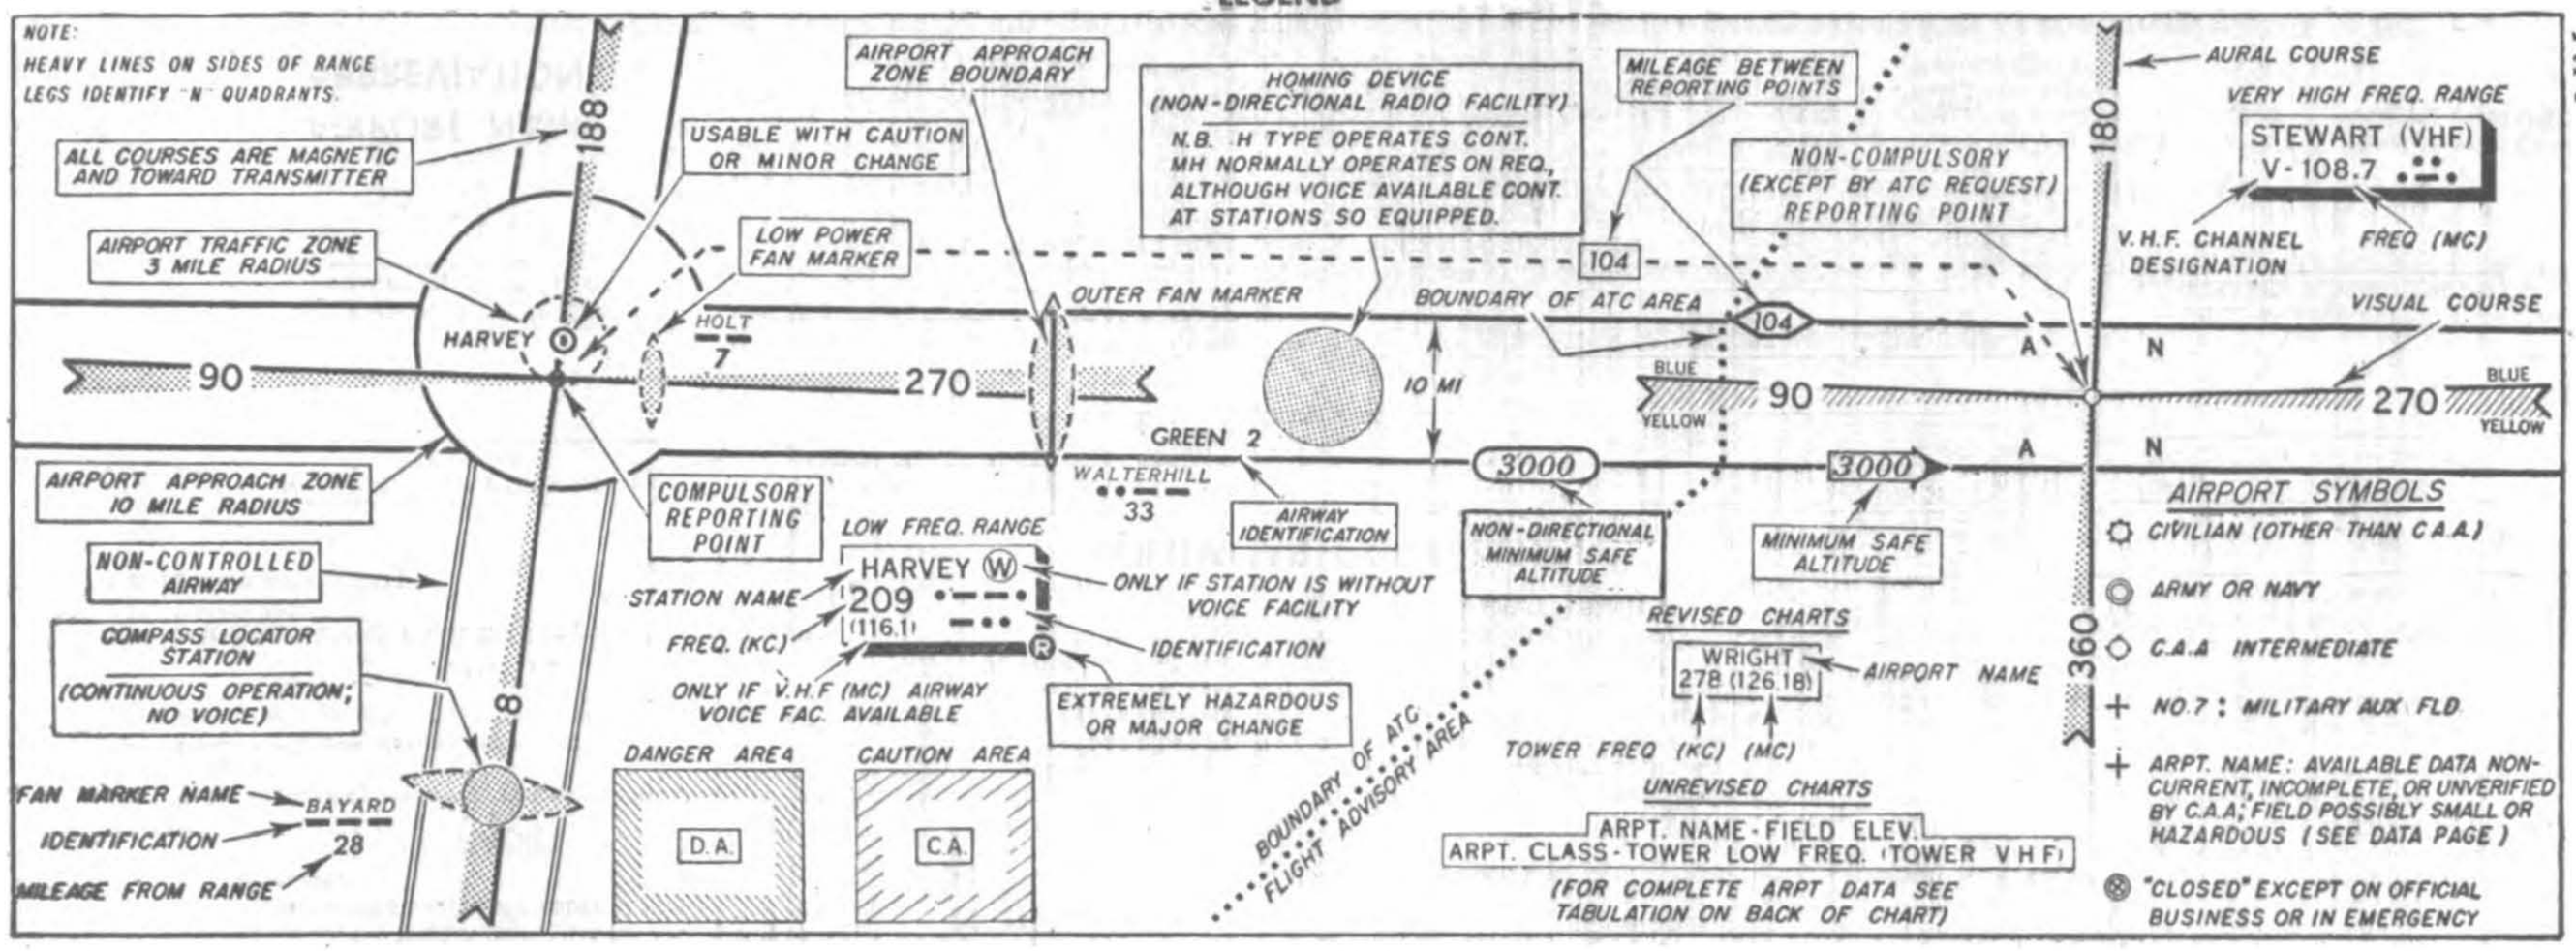

CHART CONTENTS

The Flight Planning Charts, in addition to the warning (R) and caution (O) symbols, indicate: (1) all aeronautical radio facilities except air carrier stations; (2) all minimum safe altitudes and fix mileages: (3) all Army and Navy fields and CAA intermediate fields, and all active civilian airports; (4) all danger and caution areas; (5) all designated airways. These charts indicate all facilities, and the current status thereof, on record with the CAA as of 0001 E.S.T. each alternate Tuesday.

CHART PURPOSE AND USE

The primary purpose of these charts is to facilitate the planning and execution of cross-country flights. The user should check the charts for the symboled (R) or (O) items between his point of departure and his destination. If there is none, there is no necessity for him to read the Notices to Airmen section as far as temporary items are concerned. As for permanent changes - all major ones, such as new field, abandoned fields, range frequency changes, etc., are currently reflected on the charts For record-keeping purposes and for the correction of charts and publications, however, the Notices to Airmen section should be carefully read.

VHF CHANNEL LETTER DESIGNATORS

Channel letter designators are being shown on the Flight Planning Charts herein only as an aid to pilots in their use of unmodified military equipment. It is emphasized that not all very-high frequencies now in use have channel letter designators. Standardization of air-borne equipment in this respect has not been effected, nor is it expected to be along the lines of one-letter designators because of the large number of frequencies which eventually will be in use.

CHART HAZARD SYMBOLS

The current status of facilities and hazards as reported to the CAA is indicated by the symbol system. An airport closed because of construction, an inoperative range, a revised range quadrant identification or range frequency, or course realignment of 20° or more, for example, are indicated by the symbol (R) for red, or warning. An airport under construction but usable, or an inoperative control tower, on the other hand, is indicated by the symbol (O) for orange, or caution.

RANGE COURSE LENGTHS

In general, the length of radio range courses shown herein indicates the approximate location where it is expected that a pilot will tune from one radio range to the next one along his route of flight. Such change-over points, however, are not mandatory, and it is expected that a pilot will use his best judgment in selecting change-over points that will best serve his needs.

Warning

Radio range courses are subject to disturbances that result in multiple courses, and signal fades and surges over rough country. Pilots flying over unfamiliar routes are cautioned to be on the alert to detect these vagaries, particularly over mountainous terrain.

Loop ranges (such as ML, RL, MRL without simultaneous feature) are not suitable for DF and ADF operations. DF or ADF use should be restricted to simultaneous type of range stations and commercial broadcast stations.

N.B. The attempt to superimpose VHF ranges cartographically upon the low frequency system practically nullified the Guide charts for either VHF or LF navigation.

It was decided, therefore, to give the VHF ranges separate coverage. With the Guide's stringent page limitations, separate VHF range charts necessitated the elimination of the Civil Airways and Mileage Charts. Specific flight advisory and traffic control area boundaries and specific fix mileages, however, may still be found on the individual Guide Charts.

It is hoped that the mileages tabulated above facilitate flight planning because the addition of small sector mileages is no longer necessary.

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/gnd communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25,D.C. for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

✓ CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety angle than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

✓ USE OF AIRPORTS BY MILITARY AIRCRAFT: (1) AAF REGULATION 85-2: The attention of Army clearance personnel and of Army pilots is invited to the provisions of Section III, AAF Regulation 85-2 and AAF Regulation 85-2A, which state in part: "Except for those Army aircraft assigned to civil contractors or agencies under bailment contract, no Army aircraft will utilize civil airports which have not been leased, purchased, or where AP-4 or similar landing rights agreements have not been negotiated by the Government, except in case of emergency or in case of official business. Each instance of flights in AAF aircraft for official business will be covered by competent air force, major air command, or higher authority orders. Each instance of flights for official business in organic aircraft of the Army Ground Forces will be covered by written orders of the commander of the unit to which the aircraft is assigned. These written orders must designate the field of intended landing. Unauthorized use of such airports is a substantiating factor in claims for damage with accompanying requests to the Government to bear maintenance and repair costs or to provide Government equipment at such civil airports. Notation will be made by clearing authorities in Remarks section of AAF Form 23 that competent authority authorizes use of such fields and will be transmitted in Remarks Section of the flight plan as 'authorized flight'. All landings by military aircraft without competent written orders on inactive, temporarily inactive Army airfields and civilian airports, except in case of emergency, will be limited to the ones identified by letters "A, N, NG, or P" in the Airman's Guide. It is the responsibility of the various air forces, major air commands and certain field activities under the direct control of the Commanding General, AAF, to prevent unauthorized use of airfields and airports as outlined in this Regulation".

2. "OFFICIAL BUSINESS" within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the puspose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

3. POLICY OF ARMY USE OF TEMPORARILY INACTIVE AIRFIELDS: (a) Municipal airfields which have been used jointly by the Army Air Forces and civil interests and at which Army facilities are temporarily inactive but the civil facilities are still active, may continue to be used by military aircraft. No servicing other than that provided by commercial concerns will be available. Such airfields will be identified herein (directory section only) by the following notice: "ARMY TEMP INACTIVE - CIVIL FACS"
(b) Temporarily inactive Army airfields used exclusively by the Army Air Forces (either owned or leased) or municipal airfields used jointly by the Army Air Forces with civil interests at which both Army and civil facilities are inactive will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned. Such airfields will be identified herein (directory section only) by the following notice: "TEMP INACTIVE. NO FACS.". Above policy statement is not to be construed as countermanding any AAF Regulations or letters governing command use of municipal airports or Army airfields.

4. "CLOSED" ARMY AIRFIELDS: Under the provisions of AAF Regulation 60-23 or under specific direction of the CG, AAF, from time to time certain airfields under the jurisdiction in whole or in part of the Army Air Forces will be listed as "CLOSED": Such as, (a) Fields closed to all transient traffic except on official business or in emergency; (b) Fields that have been declared surplus to the AAF and on which permits have not been issued for civil use or which have not been otherwise disposed of by WAA. The listing "CLOSED" will appear in the directory section only. Airfields so designated will be used on official business only under written orders in each case.

CLEARANCE OF AAF AIRCRAFT: National Guard Units are not authorized to clear AAF aircraft. At bases occupied solely by National Guard, clearance for AAF aircraft will be obtained from Flight Service in accordance with provisions of paragraph 2, AAF Regulation 60-22.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA - Morrison Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Morrison Field, Fla.,

Washington National Airport, D.C., or Westover Field, Mass., CANADA - Great Falls AAF, Mont., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., Kelly Field, Tex., or Morrison Field, Florida. CARIBBEAN - Morrison Field, Fla., or Kelly Field, Tex. ENGLAND, GREENLAND, ICELAND, NOVA SCOTIA, NEWFOUNDLAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. (Note: Selfridge Field also will clear for Nova Scotia and Newfoundland). HAWAII - Fairfield-Suisun AAF, Calif.

PILOT PROCEDURES WITH FLIGHT SERVICE USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22. (2) Departure from non-AAF Bases: AAF aircraft departing from a non-AAF base will file a complete flight plan with, and when necessary, secure approval from, the nearest Flight Service center prior to take-off, or as outlined in AAF Regulation 60-22. Communications with a Flight Service center may be established by direct telephone or by a radio call to the nearest AAF base or AACS airways radio station. After contacting the Flight Service center, and obtaining flight plan approval when necessary, pilots contemplating flight under IFR will secure a CAA Airway Traffic Control clearance. The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA communications facilities are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an AACS airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change of route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service. One position report each 30 minutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions, pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service advisories. (7) Voice Calls: AACS airways radio stations will be called by the location name followed by the word "airways", such as "Bolling Airways". This is distinct from the CAA radio call system which uses the location name followed by the word "radio", such as "Washington Radio". (8) RON Messages: At bases not connected with Flight Service centers by military interphone, pilots may file RON messages via long distance telephone to the Flight Service center at the time the arrival report is filed. (9) All VHF equipped aircraft will be provided with a card to be prominently mounted near the VHF control box which will specify button, frequency, and service obtainable. An index of AACS airways stations within the U. S., together with a listing of the assigned frequencies, may be found on pages 94 and 95 of T.O. 08-15-1. The following table displays the channels and frequencies normally used to contact the various communication installations:

Button	Frequency	Service	
A	116.1 mcs.	CAA AIRWAYS (RANGE STATIONS)	* AACS Airways
B	126.18 mcs.	CONTROL TOWERS	(Plan 62)
C	137.88 mcs.	AACS AIRWAYS (PLAN 62)	* Control Towers
D	140.58 mcs.	MILITARY EMERGENCY & GCA FINAL APPROACH CONTROL	

* Available for service indicated on a secondary basis.

(10) It will be some time before all AAF aircraft are equipped for operation on AACS airways frequencies. It is not the intent that pilots flying aircraft not so equipped attempt to make position reports to Flight Service as described above. Emergency Flight Service advisories, however, may be transmitted to such aircraft on the AAF control tower frequency. Aircraft which are equipped for operation on AACS airways frequencies will contact airways station whenever possible rather than AAF control towers. (11) The following list of telephone numbers will be used for contacting military Flight Service Centers:

CAA AREA	FLIGHT SERVICE AREA	PHONE NO.
Washington; Pittsburgh; New York; Boston	Olmsted Flight Service Center Middletown, Penna.	Steelton 93387 Steelton 93470
Jacksonville; Miami	MacDill Flight Service Center Tampa, Fla.	Tampa H-4871
Memphis; New Orleans; Atlanta	Maxwell Flight Service Center Montgomery, Ala.	Montgomery LD 89
Cleveland; Cincinnati; Detroit; Chicago; St. Louis	Wright Flight Service Center Dayton, Ohio	Osborn 88691 Osborn 88692
Ft. Worth; San Antonio; part of El Paso	Ft. Worth Flight Service Center** Fort Worth, Tex.	Fort Worth 77251
Denver; Minneapolis; Kansas City	Lowry Flight Service Center Denver, Colo.	Denver LD 116 LD 117
Los Angeles; Albuquerque; part of El Paso	March Flight Service Center** Riverside, Calif.	Riverside 7107 Riverside 7108
Oakland; Salt Lake	Hamilton Flight Service Center Hamilton Field, Calif.	San Rafael 770 San Rafael LD-20
Great Falls; Seattle	McChord Flight Service Center Tacoma, Washington	Tacoma LD-20 Tacoma LD-21

**REVISION OF ARMY FLIGHT SERVICE CENTER AREAS: The boundary between the March and Fort Worth Flight Service Areas has been moved. That part of the El Paso CAA area lying E of the following points now falls within the Fort Worth Flight Service Area; that part lying W within the March Flight Service Area: From 25 miles SE of the Clarendon Range, thence SSW to lat. 33°, long. 101°35', thence W to 33°-104°, thence S to 31°-104°, thence W to the U.S.-Mexican Border at 31°-105°34'

IFR CLEARANCE OF ARMY AIRCRAFT: Except as outlined below, no Army aircraft will be cleared for instrument flight unless such aircraft is equipped with a low frequency radio receiver capable of reception in the 200 to 400 kc. band. The BC-1206 (Detrola) receiver is not considered adequate as regards compliance with this directive. Aircraft not so equipped may be permitted to clear under IFR when the instrument type clearance is necessitated by reduced local visibility caused by fog, smoke, or haze, or when the flight will not be conducted under conditions which will require navigation by radio.

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with AAF Letter 63-9 of April 24, 1947, the following instructions will govern the clearance of AAF aircraft to and from the New York City Area (encompassed by a 25-mile radius from the southern tip of Manhattan).

(A) FLIGHTS INTO THE AREA: AAF aircraft flying into the area may be cleared for any authorized field therein, but will in all cases secure in-flight approval from Flight Service by contacting Mitchel Airways prior to proceeding to the field of destination. AAF Form 23 will indicate a flight plan to the field of destination via Mitchel Fld. Mitchel Airways will secure Flight Service approval of further clearance to other fields in the area under the conditions listed below only. If further clearance is refused, aircraft will land at Mitchel Field or at any other authorized field outside the area.
(1) CFR. When the ceiling is at least 2000' and the visibility is 3 miles or more.
(2) IFR (a) When the visibility is not less than 1 mile and the ceiling is unlimited. (b) When the visibility is not less than 2 miles and the ceiling is not less than 5000'.

(B) FLIGHTS OUT OF THE AREA: AAF aircraft departing from the area from fields other than Mitchel will be cleared subject to the conditions listed above for CFR and IFR clearances.

AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempted from the above restrictions.

✓ SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A, N, NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

✓ V.H.F. CHANNEL ASSIGNMENTS:

Following are Army assignments:

Channel	Frequencies
A	116.1
B	126.18
C	137.88
D	140.58
G	137.70
H	134.10
U	108.3
V	108.7
W	109.1

Following are Navy assignments:

Channel	Frequencies
1	116.1
2	142.56
3	126.18
4	128.70
5	143.28
6	134.64
7	143.64
8	142.02
9	142.74
GUARD	140.58

ARMY DISTRESS, AND SEARCH AND RESCUE PROCEDURE: 1. When an aircraft is in distress and the pilot is unable to establish two-way communication on any frequency, he will transmit as follows: "Mayday. Mayday. Mayday. This is Army 1 2 3 4, this is Army 1 2 3 4, this is Army 1 2 3 4, my approximate position is --, Over." Pilot may follow this emergency transmission with any other information he deems necessary. Although Channel "D" (140.58 mcs) has been designated as the joint Army-Navy emergency frequency, the pilot in distress will use any or all frequencies at his disposal. Communication coverage on various frequencies will vary depending upon the location of control tower, airways, VHF/DF, and other radio stations. 2. To request escort by Air Rescue Service rescue plane when two-way communication can be established, aircraft in distress will: (a) Contact Flight Service through nearest AACS airways station. (b) Give position report; if position is not known, request QTF (Fix). (c) Give nature of trouble, also estimated time plane can remain aloft. (d) Follow instructions transmitted by Flight Service. (e) Follow instructions of Air Rescue Service aircraft after contact is accomplished. 3. To report sighting of crashed aircraft: (Note: Previously reported and identified crashes are marked with yellow paint). (a) Contact Flight Service through nearest AACS airways station. (b) Give position of crash. (c) Evidence of survivors, type and number of aircraft (if possible). (d) Follow instructions transmitted by Flight Service. (e) Immediately after landing make a complete report for transmission to the nearest Air Rescue Unit; also notify nearest Army Air Forces installation.

SERVICING FOR ARMY AIRCRAFT: Transient Army servicing is usually available at active Army airfields and, when available, is indicated in the remarks column, data section by an "S" designation (as defined under data legend) and octane ratings of gas are shown. At airports designated by a single (A) in the "Airman's Guide" (joint use with civil interests), Army servicing is available unless remarks column carries "ARMY TEMP INACT-CIVIL FACS." Notation is given in remarks column to servicing available for military aircraft: for example, "91, 100 oct. Army". This may be contract service. As a matter of policy, limited servicing and maintenance will be available to transient military aircraft at Air National Guard Fields (on Form 15). Notation with regard to available facilities will be shown in the remarks column; for example, "91,100 oct. NG". At (P) or civil fields, military servicing or Army contract fuel will not be available; servicing may be secured in emergency only on a Form 15. Army servicing may be procured at Navy fields on a Form 15.

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

OLD PILOT CERTIFICATES MUST BE EXCHANGED: All pilot certificates issued prior to July 1, 1945, will expire July 1, 1947. Such certificates may be exchanged for new-type certificates at any time prior to their expiration date.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum. (5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

✓ V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize. (See pages 144, 145, 146 for VHF range coverage).

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 mcs. and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs. for

transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.8 mcs. but the communications station program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs. in addition to towers' low frequencies. See individual data pages in the Airman's Guide for inclusion of these frequencies as commissioned.

U. S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

✓ NON-COMPULSORY REPORTING POINTS: (1) The intersection of the W course of the Los Angeles (LF) Range Station and the SW course of the Burbank Range Station has been designated a non-compulsory reporting point known as "Burbank" (2) The intersection of the N course of Pocatello Range Station and the NW course of the Idaho Falls Range Station has been designated a non-compulsory reporting point known as "Roberts"

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct "TO-08-15-1", dated April 24, 1947, page 98, by showing an X-band Radar beacon in operation at Jacksonville, Fla.: Location: 30°15'35" N, 81°40'05" W; Code: 3-1; Operating Agency: USCG; Operating hours: Continuous.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Effective Date
Glens Falls, N.Y.(Warren Co.)	Hourly	43-21, 73-37		Reestablished
Sunbury, Pa.	Hourly	40-54, 76-47	458	Reestablished
St. Cloud, Minn.	Raob & Pibal	45-35, 94-11	1043	Begun
Deming, N. M. (AAF)	Supplementary	32-15,107-43	4297	Established
St. Paul, Minn.	Pibal & Raob			Discontinued

NOTE: Airway terminal forecasts now available for LaCrosse, Wisconsin but no longer available for Traverse City and Pellston, Michigan.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off. (b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60). (c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

FOREIGN DATA

SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume-1, No. 2, dated January 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

✓ UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom military air bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the United States or the United Kingdom and are in ferry status: (a) For regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana; b) For alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad.

Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters AAF, Washington, D.C., prior to the departure of each flight or series of flights.

CAUTION ADVISED IN USE OF GUATEMALA-HONDURAS AREA AERONAUTICAL CHARTS: Flight checks have revealed that elevations indicated on Gulf of Fonseca (710) Aeronautical Chart covering the Guatemala-Honduras-Nicaragua Area, dated Dec. 1946, are as much as 4300 feet too low. This chart base is being thoroughly re-checked and a new chart will be issued as soon as possible.

TRANSMISSION OF INTERNATIONAL NOTAMS: Effective May 10, 1947, the transmission of international notams to Service A circuits by WSY New York was discontinued. Offices desiring receipt of this material should obtain receiving drops on the Service O system.

JUNE 10,1947

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagnes, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; EIP Shannon; FXO Paris; WFH Port Lyautey. Inter island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

AFRICA-Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

BERMUDA-Somerset NAS Radio Facility: Somerset NAS transmissions, air ground CW 3285 and 6253 kcs., were discontinued April 3, 1947.

BRITISH WEST INDIES-Antigua NAF: The following red obstruction lights have been discontinued at Antigua NAF. Aircraft utility building height 50' two lights. Main supply building height 60' one light. Power house height 40' one light. The following red obstruction lights will be discontinued at sunrise June 1, 1947. Three obstruction lights on water tower, two at 75' level and one at 155' level.

Goat Island, Jamaica Coast Guard Radiobeacon: The Coast Guard Radiobeacon at Goat Island, Jamaica, has been discontinued.

Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Station - call letters MRX. Flight plans also must be filed for all flights departing from U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters WBR, or New Orleans-call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 2870, 3105. and 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file Flight Plans from point of departure to the Communication Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA operated Overseas Foreign Aeronautical Communications Station, WBR, Miami.

CANADA-Pennfield Ridge, N.B.-Radio: Range courses realigned: 168-A, 273-N, 359-A, 104-N. (5-1)

CUBA-Rancho Boyeros Airport, Havana: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file flight plans prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type; route of flight; time of flight departure; time of minutes; altitude; CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

GREECE-Hassani Airport, Athens Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

MEXICO-Mexican Entry Fees: At Mexican Airports of Entry, charges include an overtime fee of 30 pesos after 12 noon for Immigration Inspection and a fee based on a full day's wage for each inspector involved for each 3 hours of overtime or fraction there of after 2 P.M. for a Customs inspection. Charges may also be made for a Customs guard to watch the plane and for the taxi fare to bring inspectors to the field after 12 noon. In American money total fees may approximate $15 to $20.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

PUERTO RICO-San Juan Pre-Flight Clearances: San Juan Civil Air Terminal (U.S. Naval Air Station) Isla Grande Airport, San Juan, P.R. - All civil operations at San Juan Air Terminal were assumed by the Puerto Rico Transportation Authority effective March 4, 1947. Authority must be obtained for landings at this airport prior to the commencement of any flight. Address requests to Airports Division, Box 3508, San Juan, P.R. Cable address is "Autoritan"

San Juan, Losey Field: May 1, 1947, Puerto Rico Transportation Authority took over the operation of Losey Field at Ponce. Operations at this field are restricted except in emergency to the southernmost 150' of the E/W runway - several bad holes on the northern half. NW/SE runway closed. Field available to daylight CFR operations only. (4-25).

San Juan, Caguas: Radio antenna tower under construction unlighted until further notice, height 150', located 1-1/4 miles N of Caguas at latitude 18-15-20 N, longitude 66-1-53 W.

DOMESTIC DATA

[redacted]

ALA-TENN-GA ARPT (BRIDGEPORT)-Ctn in wet weather. (5-22)
ALBERTVILLE ARPT-SW side of strip soft, rough and washing. Soft in spots in wet weather. (4-29)
ALLENPORT (MONTGOMERY)-Muddy after rains. Use with ctn. (5-22)
ATHENS ARPT-Ctn in wet weather. (5-22)
ANDALUSIA ARPT-Bare in spots. Ctn in wet weather. (5-22)
ANNISTON ARPT-Ends of strips soft in wet weather. (4-29)
ATMORE FLYING SERVICE-Soft in wet weather. (5-22)
ATMORE INT, SITE 16, NO-AG-Emerg use only. (5-22)
BARIN NAAS EAST & WEST FLDS (FOLEY)-Closed to trans acft. (5-6)
BATES FLD (MOBILE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile ground traffic. (5-16)
BEAVER DAM FLD (DECATUR)-Soft after rainy weather. (5-22)
BIRMINGHAM ARPT-Closed to civil acft not equipped with operating rcvr. No landings on sodded areas. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (5-20)
BOYKIN FLD (DEMOPOLIS)-Cattle on fld. (5-22)
BREWTON ARPT, new-Cattle on fld. (5-22)
BROOKLEY FLD (MOBILE)-RADIO: Effect. Apr. 25, oper of AACS operated HF/DF stn temp suspended until further notice. (4-24) FLD: Soft-use rnwys, taxi strips only. (4-23)
**CAMP SIBERT ARPT (GADSDEN)-Will hereafter be carried as Camp Sibert Arpt. (Attalla). See page 116.
CENTRAL PARK ARPT (BIRMINGHAM)-Avail. lgt acft in all weather. (5-22)
CENTRE ARPT-NNW/SSE strip closed. N side E/W strip rough in wet weather. Avail. lgt acft only. (4-29)
CHASTAIN'S ARPT (PRICHARD)-Soft after rains. Shallow dip near center of E/W strip. (5-22)
CRAIG FLD (SELMA)-RADIO: Army DF stn inop. (12-20) FLD: Bndry lgts inop.(5-29)
CULLMAN ARPT-Soft in wet weather. (5-22)
DAVENPORT ARPT (FT. PAYNE)-Muddy in wet weather. S end rough. (5-22)
EUTAW ARPT-Use NW/SE strip only. (4-17)
FAYETTE ARPT-Avail. lgt acft only during wet weather. Trees and fone line at W end (5-22)
FLINT CREEK ARPT (DECATUR)-Soft after rainy weather. (5-22)
GAINESVILLE INT, SITE 55, FV-AG-Emerg. use only. (5-22)
GOODYEAR FLD (GADSDEN)-Soft in wet weather. Safe for lgt acft-land with ctn. (5-22)

[redacted]:GRAGG FLD, SITE 27, PS-TM (CLANTON)-Ctn in wet weather. (5-22)
GREENVILLE ARPT, SITE 24, NO-AG-Soft after rains around arpt circle on N/S strip. (5-22)
GUNTER FLD (MONTGOMERY)-Use rnwys only. Sod areas adj rnwys and taxi strips soft. Use Maxwell Fld for trans svcg. (1-10)
GUNTERSVILLE DAM ARPT-Soft spots at ends. (5-22)
HARTSELLE ARPT-Use W side fld. Avoid E side. E half of strip has small depressions extending from S end for approx 600' toward the N. Small area at SW portion fld soft after rains. (5-22)
HUNTSVILLE ARPT-Sod strip rough at rnwy crossings. Ngt approaches use ctn-hills NE,S,E. (4-29)
JACKSON FLD (LIVINGSTON)-Rolling and slightly rough. Soft spots along N side at SW end. (5-22)
LEGION FLD (MONROEVILLE)-Do not confuse golf course fairways with landing strips. (5-22)
LUVERNE ARPT-Ctn in wet weather. (5-22)
MAXWELL FLD (MONTGOMERY)-At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)
McKEE FLD (JACKSON)-Soft after rains. Not licensed. Use at own risk. (5-22)
✦MOBILE-RADIO: Auto. range monitor. sys comm June 5.
MOTON FLD (TUSKEGEE)-Use with ctn in wet weather. Soft and rutted spots along E side. (5-22)
NAPIER FLD (DOTHAN)-Avail. civil. acft in emerg only. Obst lgt atop 175' water tank inop. (1-12)
NORMAN BRIDGE ARPT (MONTGOMERY)-Muddy after rains, but not soft. (5-22)
NORTH SAUTY BASE (SCOTTSBORO)-SSE end soft in wet weather. (5-22)
OAK ARPT (FOLEY)-W end E/W, N end N/S strips soft in wet weather. (5-22)
ONEONTA ARPT-N 800' strip wet, soft and rough. Unserviceable in wet weather. (4-29)
PRYOR FLD (DECATUR)-Rough spots around wind sock, mrkd. (5-22)
ROBERTS FLD (BIRMINGHAM)-S side fld avail. during wet weather. (5-22)
RUSSELL FLD (ALEXANDER CITY)-Washes on S edge near W end E/W strip, mrkd. (5-22)
SCOTTSBORO FLYING SERVICE-Soft in extremely wet weather. Rough spots on SE corner. (5-22)
SOUTHERN AIRMOTIVE ARPT (DOTHAN)-Twr 3/4 mi W. (5-22)
STROTHER FLD (GASTONBURG)-PRIVATE. Cattle on fld. (5-22)
TALLADEGA ARPT-N 700' N/S strip soft in wet weather. (5-22)
VALLEY AIR SERVICE (LANETT)-Soft after rains. (5-22)
VAN DE GRAAFF ARPT, SITE 59, FV-AG-(TUSCALOOSA)-Heavy acft avoid extreme NW and SW corners of fld after heavy rains. (6-3)
WALKER CO. ARPT (JASPER)-Land inside of bndry mrkrs. Avoid new landing strip now being graded. (5-22)
WEEDON FLD (EUFAULA)-Trees in W approach. (5-22)
WINFIELD ARPT-In wet weather avoid S end N/S strip-soft. (5-22)
WOOD-DEARING ARPT (RUSSELLVILLE)-Muddy in wet weather; safe for lgt acft, but land with ctn. (5-22)

PANAMA AIRWAY TRAFFIC CONTROL AREA

The Panama Air Traffic Control Center controls all air traffic operating along airways under instrument flight conditions within approximately 200-miles of the Canal Zone. The Panama Air Traffic Control System was established in accordance with the standards promulgated in "Army-Navy-CAA, Standards for the Control of Instrument Flight Rule Traffic" (ANC-IFR) and other standard operating procedure references, and the Control Center operates substantially the same as an air traffic control center in the United States.

Clearance to fly on these airways is obtained from "Panama Air Traffic Control" through radio facilities indicated, and must be obtained before entering the Panama Air Traffic Control Area.

The Manual of Operations for Panama Air Traffic Control is CAirC Manual 55-1. Agencies expecting to use these facilities may obtain copies of this manual from, or may direct questions or suggestions to: The Panama Air Traffic Control Center, Det. 153rd ACS Squadron, APO 825, c/o Postmaster, New Orleans, La.

Clearance for departure within the control area is obtained through the airport control tower. Normally civilian aircraft entering the control area from the Northwest will obtain initial clearance through Pan-American Radio at San Jose, Costa Rica, and military aircraft through Parrita Army Airways (Parrita Range) at Parrita, Costa Rica. Aircraft entering the Control Area in the vicinity of Turbo, Colombia or departing from Turbo to enter the Control Area, will obtain original clearance through Pan-American radio at Turbo. At any rate, however, civilian aircraft may establish contact with the Control Center through Balboa Radio WHZ and military aircraft may establish contact through Albrook Army Airways (WZA).

FLIGHT PLANNING CHARTS AND DATA PAGES ..... 1 - 143
V.H.F. RANGE CHARTS ..... 144 - 147
AIRWAY MILEAGES 148
NOTICES TO AIRMEN 149

GUIDE CONTENTS

THE AIRMAN'S GUIDE IS A COMPOSITE DIRECTORY OF AIRPORTS, AIR NAVIGATION RADIO AIDS, AND NOTICES TO AIRMEN. ON THE DATA PAGES ARE TABULATED ALL THE DATA COVERING THE FACILITIES CHARTED ON THE BACKING PAGES. THIS PRESENTATION IS GRADUALLY BEING REVISED, HOWEVER, SO THAT EVENTUALLY THE DATA PAGES WILL FACE THE CHARTS.

INDEX OF FACILITIES

TO FIND THE NUMBER OF THE PAGE ON WHICH A FACILITY IS CHARTED, REFER TO THE INDEX OF FACILITIES BELOW. AS OUTLINED ABOVE, THE DETAILED DATA FOR THE FACILITY WILL BE FOUND ON THE DATA PAGE BACKING, OR FACING, THE CHART.

NEW DATA PRESENTATION

(A) ON THE DATA PAGES BACKING OR FACING THE CHARTS, NEW DATA OR REVISIONS ARE INDICATED BY ARROWS; (B) IN THE NOTICES TO AIRMEN SECTION, CITATIONS COVERING NEW OR REVISED RADIO DATA ARE PREFIXED BY ONE LARGE STAR " ★ " CITATIONS COVERING NEW OR REVISED AIRPORT, OR MISCELLANEOUS DATA ARE PREFIXED BY TWO ASTERISKS "**"

DATA PAGE NOTAMS

BECAUSE OF THE SERIOUS PAPER SHORTAGE, THE DATA PAGES, WHERE POSSIBLE, HAVE TO SERVE AS NOTAM (NOTICES TO AIRMEN) PAGES, RESULTANTLY, MOST OF THE NEW DATA FORMERLY NOTAMIZED IN THE NOTICES TO AIRMEN SECTION WITH PREFIXED LARGE STARS OR DOUBLE ASTERISKS ARE NO LONGER CARRIED IN THAT SECTION. ONLY COMMISSIONINGS, ABANDONMENTS, OR CHANGES SO POTENTIALLY HAZARDOUS THAT THEY ARE INDICATED WITH Ⓡ (FOR RED FLAG) SYMBOLS ON THE CHARTS, ARE NOW CITED IN THE NOTICES TO AIRMEN SECTION NOTAMIZING ON THE DATA PAGES IS EFFECTED BY THE USE OF PREFIXED ARROWS AS IN THE FORMER AIR NAVIGATION RADIO AIDS PUBLICATION. ANY CHANGES FROM THE PREVIOUS ISSUE, WHETHER CITED IN THE NOTICES TO AIRMEN SECTION, OR NOT, ARE INDICATED BY THE PREFIXED ARROWS. FOLLOWING ARE EXAMPLES OF CHANGES NOTAMIZED ONLY ON THE DATA PAGES: FIELD OBSTRUCTION, SERVICING, ELEVATION, LOCATION, AND RUNWAY LENGTH CHANGES. BECAUSE OF THE USE OF THE PREFIXED ARROWS AS NEW DATA INDICATORS, A FURTHER INNOVATION HAD TO BE ADOPTED. THIS IS A TINTED HORIZONTAL LINE FOLLOWING THE LAST TABULATED FACILITY AND TITLED EITHER NEW RADIO FACILITIES OR NEW AIRPORTS.

HOW TO USE THE AIRMAN'S GUIDE

NEW FACILITIES ON DATA PAGES

SPACE BELOW THE TINTED HORIZONTAL LINES ON THE DATA PAGES HAS BEEN RESERVED AS A SUPPLEMENT FOR NEW RADIO AIDS AND AIRPORTS WHOSE DATA WERE RECEIVED AFTER THE DATA PAGES WERE ORIGINALLY TYPED. REVISIONS TO EXISTING AIRPORTS AND RADIO AIDS ARE SUPER-IMPOSED ON THE OLD DATA. NEW AIRPORTS AND RADIO AIDS HOWEVER, ARE LISTED, NECESSARILY OUT OF ALPHABETICAL ALIGNMENT, BELOW THE TINTED HORIZONTAL LINES UNTIL THE PAGE IS RE-TYPED.

CHART NOTAMS

NOTAMIZING ON THE CHARTS IS EFFECTED BY USE OF THE SUPERIMPOSED Ⓡ AND Ⓞ SYMBOLS. THE Ⓡ (FOR RED FLAG) INDICATES A VERY HAZARDOUS CONDITION OR A MAJOR CHANGE. THE Ⓞ SYMBOL (FOR ORANGE FLAG) INDICATES A MINOR CHANGE OR HAZARDOUS CONDITION WITH THE FACILITY STILL USABLE WITH CAUTION. THE PERTINENT DETAILS TO WHICH THESE SYMBOLS REFER WILL BE FOUND LISTED IN THE NOTICES TO AIRMEN SECTION UNDER THE FACILITY NAME (AND STATE) BY WHICH THEY ARE CHARTED.

Ⓡ and Ⓞ SYMBOLS

THESE SYMBOLS WERE ADOPTED FOR SUPER-IMPOSITION OVER CHARTED FACILITIES TO INDICATE HAZARDOUS CONDITIONS AND COVERING NOTICES TO AIRMEN. THUS, IF A CHART USER NOTES NO SYMBOL ON THE FACILITIES HE IS PLANNING ON USING, THERE IS NO NECESSITY FOR HIM TO WADE THROUGH THE 30-ODD PAGE NOTICES TO AIRMEN SECTION

NOTICES TO AIRMEN SECTION

ALL TEMPORARY CONDITIONS (FIELD SOFT, RUNWAY UNDER CONSTRUCTION, RANGE COURSE OUT OF ALIGNMENT, ETC) ARE CITED IN FULL IN THE NOTICES TO AIRMEN SECTION UNTIL THEY ARE NO LONGER IN EFFECT. WHEN A CITATION CARRIES A PERMANENT ITEM AND A TEMPORARY ITEM, THE PERMANENT ITEM IS UNDERLINED. PARENTHETICAL DATE AT END OF ITEM INDICATES TIME ITEM WAS REPORTED. TO CONFORM TO CHART PRACTICE, ALL FACILITY DATA ARE LISTED IN THE NOTICES TO AIRMEN SECTION AND ON DATA PAGES ALPHABETICALLY BY STATES AND BY FACILITY NAME. THUS, AN AIRPORT WILL BE FOUND LISTED ALPHABETICALLY UNDER ITS OWN NAME RATHER THAN UNDER ITS LOCALE'S NAME. IF THE AIRPORT OR RADIO FACILITY NAME IS OTHER THAN THAT OF THE CITY IN WHICH IT IS LOCATED, THE LOCATION IS SHOWN IN PARENTHESIS AFTER THE FACILITY NAME.

SPECIAL NOTICES

NOTICES OF NATIONAL INTEREST, OF GREAT IMPORTANCE, OR OF NON-LOCALIZED NATURE, WILL BE FOUND AT THE BEGINNING OF THE NOTICES TO AIRMEN SECTION.

CIVIL FACILITY CHANGES: ADVISE WHOM

PLEASE ADVISE THE OFFICE OF AVIATION INFORMATION, ATTENTION A-250, C.A.A., DEPARTMENT OF COMMERCE, WASHINGTON 25, D.C. AS SOON AS TEMPORARY CONDITIONS COVERING CIVIL AIRPORTS OR NAVIGATIONAL AIDS BEGIN OR TERMINATE, OR FLIGHT HAZARDS ARE ERECTED OR REMOVED. FIELD DATA REVISIONS SHOULD BE SUBMITTED TO THE NEAREST C.A.A. DISTRICT AIRPORT ENGINEER.

TO ALL SUBMITTERS OF AIRMAN'S GUIDE DATA

AN UNDER-MANNED STAFF PREVENTS AN INDIVIDUAL ACKNOWLEDGMENT OF DATA SUBMITTED FOR THE AIRMAN'S GUIDE BY TELEGRAM, TELETYPE DISPATCH, OR LETTER. YOUR COOPERATION IN PERMITTING A GUIDE CITATION TO SUFFICE AS AN ACKNOWLEDGMENT WILL BE APPRECIATED.

INDEX OF FACILITIES

LEGEND

A - AIRPORT WITH AN ASSOCIATED RADIO FACILITY IDENTICALLY NAMED
FM - FAN MARKER
R - NON-DIRECTIONAL RADIO BEACON
R - RADIO RANGE
T - AIRPORT WITH CONTROL TOWER

N.B. ALL FACILITIES WITHOUT A LETTER SUFFIX ARE AIRPORTS. NAMES NOT FOLLOWED BY A NUMBER SUFFIX ARE NOT AIRPORTS BUT MERELY GEOGRAPHICAL LOCATIONS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aricraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NAVY GROUND CONTROLLED APPROACH (GCA): Universal frequencies allocated primarily for Navy GCA operational use ,transmitting and receiving, are as follows:

HF Communications	VHF Communications
3475,4890,6640 kcs.	134.64,142.02,143.64 mcs.

Navy GCA Units shall be prepared to control aircraft on the interim U.S. emergency **frequency, 140.58 mcs, transmit and receive. Use of this frequency should be** restricted **to emergencies and routine check of communication equipment.**

In addition to above, Navy GCA Units will be prepared to transmit on HF from 2000 to 18100 kcs. and receive on 1500 to 9050 kcs to aid any plane in emergency.

To promote flight safety, the Navy Department has made its GCA facilities available to civil aircraft for emergency use. Practice approaches by civil aircraft is restricted to multi-engine aircraft because of personnel and equipment limitations. Navy GCA Units shall be prepared to control scheduled aircarriers in emergencies on 140.58 mcs and 3117.5 kcs, transmit and receive. In addition arrangements shall be made to transmit GCA control instructions on tower low frequency either directly or by relay through **the tower to aircraft in distress and not able to receive on any other frequency.**

Call signs for all Navy GCA Units are the name of the field plus "GCA". Example: "Norfolk GCA".

ARMY GROUND CONTROLLED APPROACH (GCA): (a) CONTACT: Pilots requiring GCA assistance should call the associated control tower requesting instructions for working GCA. Example: "Andrews Tower, this is Army 5555, request GCA". (b) TOWER INSTRUCTIONS:**Control towers will ascertain frequencies available to both** pilot and **GCA, advise the pilot and establish contact with the GCA unit. Example: "Army 5555, this is Andrews Tower, do you have channel G, over". "Andrews Tower, this is Army 5555, channel G available, over". "Army 5555, this is Andrews Tower, establish contact with GCA on channel G, out". "Andrews GCA, this is Army 5555, over". "Army 5555, this is Andrews GCA, your position is now etc.....". (c) EMERGENCY: When receiver and transmitter difficulties exist, the tower may relay Ground Controlled Approach instructions to the pilot. However, from a safety standpoint the procedure should be used as an emergency contingent only. (d) ALERTING GCA: After being inoperative, GCA units require approximately 20 to 30 minutes for warming up. Pilots should anticipate requirement for GCA in flight planning and request alerting of GCA units as far in advance as possible.**

C.A.A. GROUND CONTROLLED APPROACH (GCA): The C.A.A. has control tower-operated GCA units at Washington National Airport, Chicago Airport. The Indianapolis GCA unit is not remoted to the tower. The La Guardia Field unit will be **commissioned in the immediate future.** The C.A.A. installations, however, are operating on a service test or experimental basis only, and for operator training, and can be used only for practice approaches and landings until further notice. No emergency landing service is available until these units are officially commissioned.

(4) - Station guards 3105, 4495, 6210, 3117.5 kcs.
(7-24) - Hours of operation (7 A M. to midnight) on a 24-hour clock basis
→ - New or revised data*

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited)
C..... Control Tower, CAA
CA..... Control Tower, Army
CL..... Control Tower (City,County,Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM.....VHF fan type marker (100 watts)
FMHW.....Non-directional radio beacon when combined with fan marker.
GCA..... Ground control approach system
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS.....Instrument Landing System (voice on localizer channel)
IM.....VHF boundary marker
LFM.....VHF fan type marker, low powered (5 watts not over 10 miles from range)
MH.....Non-directional radio-beacon (homing), power less than 50 watts
ML.....Range (loop radiators), power less than 50 watts.
MM.....VHF middle marker
MMK.....Compass locator station when combined with middle marker of Instrument Landing System
MRA.....Range (adcock, vertical radiators), power more than 50 less than 150 watts
MRL.....Range (loop radiators), power more than 50 less than 150 watts
OM.....VHF outer marker
OMK.....Compass locator when installed at outer marker site or within
P.....Point to point radio } 5 miles of middle marker
RA.....Range (adcock, vertical radiators), power 150 watts or more
RL.....Range (loop radiators), power 150 watts or more
S.....Simultaneous (range signals and voice) type of transmitter
T.....Teletype
TX.....Principal teletype
V.....Additional voice feature on VHF
VAR.....Visual-aural VHF range (every VAR has simultaneous voice feature)
W.....Without voice facilities
Z.....VHF station location marker at a range station

N.B. Variation is computed at the station. The distance from station to field is computed from the center of the range station to the nearest edge of the usable area of the airport. The bearing is that from the range station to airport or fan marker.

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radiobeacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Class MH stations operate on request unless otherwise cited. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

* AT THE BOTTOM OF THE LAST COLUMN, UNDER THE HEADING OF NEW RADIO FACILITIES, BORDERED BY TINTED LINE WILL BE FOUND, OUT OF ALPHABETICAL ALIGNMENT, ALL THE NEW RADIO FACILITIES TABULATED AFTER THE TYPE FOR THAT PAGE HAD BEEN ORIGINALLY SET UP.

N.B. For Digest of A.T.C. and Communications Procedures, see *FLIGHT INFORMATION MANUAL*

AIRPORT DATA

LEGEND

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A)	Airport name	(A) -	Owned or leased totally by Army
(N)	"	(N) -	" Navy
(CG)	"	(CG)-	" Coast Guard
(NG)	"	(NG)-	" National Guard
(A)	"	-	Open to civilians but owned or leased wholly or in part by Army, Air Reserve, Army aveg. detach. or contract gas usually available.
(N)	"	-	Open to civilians but owned or leased wholly or in part by Navy.
(CG)	"	-	" Coast Guard.
(NG)	"	-	" WD or State Govt, for Air Nat'l Guard. Ltd sveg. and main. for transient military acft.
(P)	"	-	Civil airport opened to military acft. (See Note 3)
★	"	-	CAA Intermediate Field

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited and indicated as "unl").

N.B. Only the length of the longest runway is cited, and its direction is not indicated. Space restrictions occasioned this policy, but logic justified it. The logical assumption may be made that runways have been laid out in accordance with the local wind rose. Therefore, in all calms, or gentle-angling winds, or winds aligned with the longest runway, the longest runway will be used. When a wind not aligned with the longest runway is of such intensity that the longest runway cannot be used, this wind makes the use of runway aligned with the wind, even though much shorter than the longest runway, sufficiently long from a safety viewpoint. Too, prior knowledge that there is, for example, a NW/SE runway is of little value to a pilot if, when he arrives over the field the wind is blowing too strongly from another direction to use that runway. Finally, the larger the number indicating the longest runway length, the greater is the assurance of a sufficient number of runways for all-wind coverage.

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.
These fields are often recognizable by airport class, comparable to, for example, "1S S1" "1S S1" suggests that the field is not too large, and that the field may not have a full-time attendant even though fuel is stored there. Lack of radio or lighting facilities, indicated by the absence of an "R" or "L" in the airport class, is a further indication that a full-time attendant may not be available. Absence of an "S" (servicing) indicates definitely that fuel, if available at all, is available only by truck from town. Any field carrying no indication of radio (R), lights (L), or servicing (S) in airport class column should be used with caution, especially a field of the small category. Fields of this nature may be inactive or not maintained, and thus dangerous for use.

NOTES

1. "(NC)" not charted. Indicates not charted because of insufficient data or inability to verify
2. → New or revised data. ✱
3. "(P)" in CITY-AIRPORT NAME column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the War Department.
4. "Effingham Int., 10, LS-ID" in CITY-AIRPORT NAME column indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no prefixed star or "Int.".
5. In Location column, the word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
6. In Remarks column:
   (a) "91 oct.", indicates fuel octanes available. "Army", or "Navy" following octane indicates Army or Navy contract fuel available.
   (b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
   (c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway.
   (d) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned (See Special Notice).
   (e) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
   (f) "PRIVATE" indicates field is available for owner only, and not to be used by others except in emergency. Only those private fields that are clearly identifiable from the air as airports are listed. Thus many personal use fields are not covered in the Guide because they are not marked or are too small.
   (g) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 10-1 glide angle are indicated.
   (h) "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field (and, in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
   (i) "FEE" indicates landing fee for private aircraft.
7. Airline stop airport names are capitalized or bracketed.

FLIGHT PLANNING CHARTS

JUNE 24, 1947

LEGEND

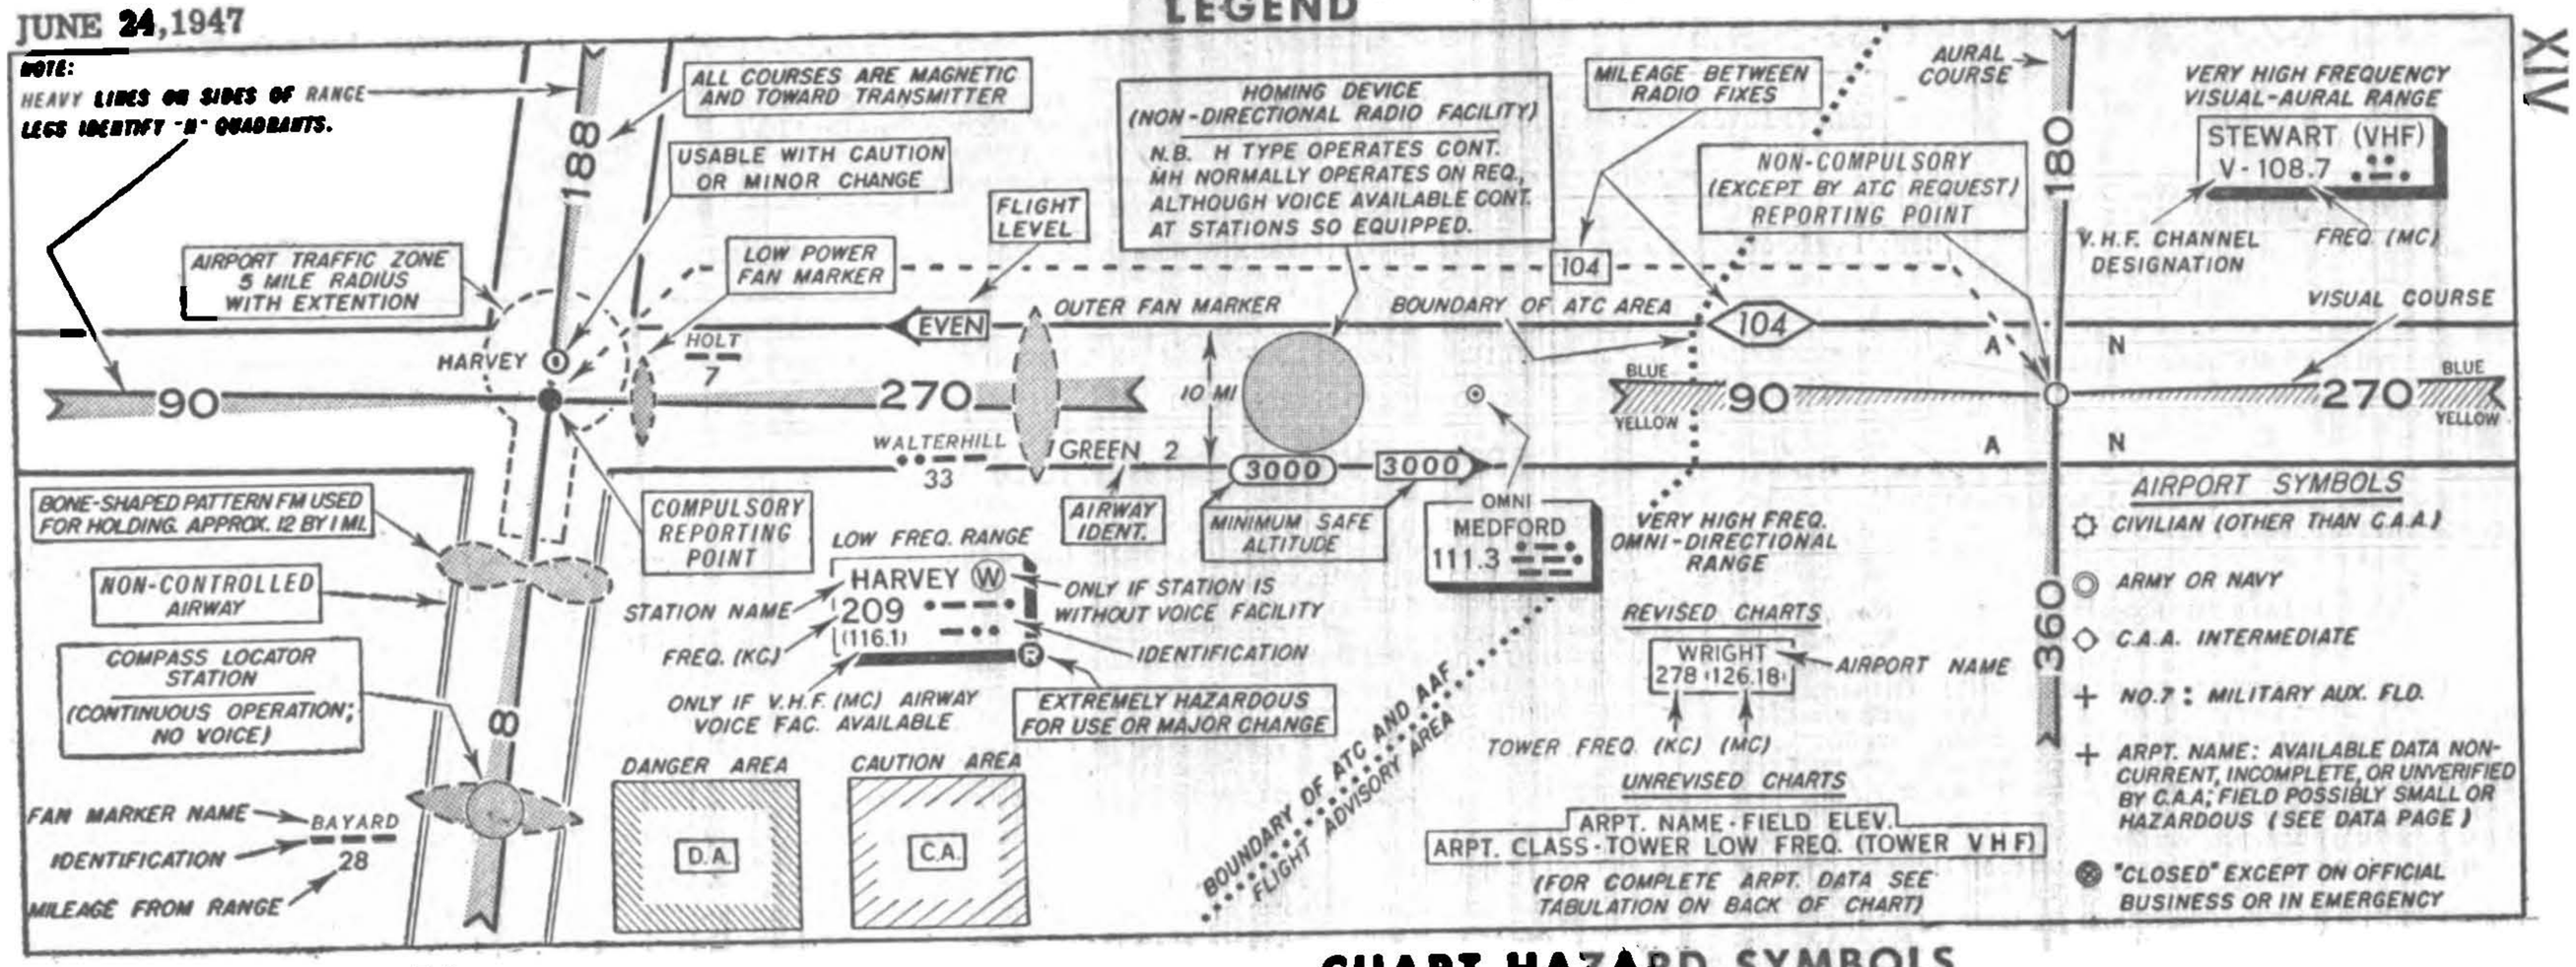

CHART CONTENTS

The Flight Planning Charts, in addition to the warning (R) and caution (O) symbols, indicate: (1) all aeronautical radio facilities except air carrier stations; (2) all minimum safe altitudes and fix mileages; (3) all Army and Navy fields and CAA intermediate fields, and all active civilian airports; (4) all danger and caution areas; (5) all designated airways. These charts indicate all facilities, and the current status thereof, on record with the CAA as of 0001 E.S.T. each alternate Tuesday.

CHART PURPOSE AND USE

The primary purpose of these charts is to facilitate the planning and execution of cross-country flights. The user should check the charts for the symboled (R) or (O) items between his point of departure and his destination. If there is none, there is no necessity for him to read the Notices to Airmen section as far as temporary items are concerned. As for permanent changes - all major ones, such as new fields, abandoned fields, range freqnency changes, etc., are currently reflected on the charts. For record-keeping purposes and for the correction of charts and publications, however, the Notices to Airmen section should be carefully read.

VHF CHANNEL LETTER DESIGNATORS

Channel letter designators are being shown on the Flight Planning Charts herein only as an aid to pilots in their use of unmodified military equipment. It is emphasized that not all very-high frequencies now in use have channel letter designators. Standardization of air-borne equipment in this respect has not been effected, nor is it expected to be along the lines of one-letter designators because of the large number of frequencies which eventually will be in use.

CHART HAZARD SYMBOLS

The current status of facilities and hazards as reported to the CAA is indicated by the symbol system. An airport closed because of construction, an inoperative range, a revised range quadrant identification or range frequency, or course realignment of 20° or more, for example, are indicated by the symbol (R) for red, or warning. An airport under construction but usable, or an inoperative control tower, on the other hand, is indicated by the symbol (O) for orange, or caution.

RANGE COURSE LENGTHS

In general, the length of radio range courses shown herein indicates the approximate location where it is expected that a pilot will tune from one radio range to the next one along his route of flight. Such change-over points, however, are not mandatory, and it is expected that a pilot will use his best judgment in selecting change-over points that will best serve his needs.

WARNING

Radio range courses are subject to disturbances that result in multiple courses, and signal fades and surges over rough country. Pilots flying over unfamiliar routes are cautioned to be on the alert to detect these vagaries, particularly over mountainous terrain.

Loop ranges (such as ML, RL, MRL without simultaneous feature) are not suitable for DF and ADF operations. DF or ADF use should be restricted to simultaneous type of range stations, H stations, and commercial broadcast stations.

N.B. The attempt to superimpose VHF ranges cartographically upon the low frequency system practically nullified the Guide charts for either VHF or LF navigation.

It was decided, therefore, to give the VHF ranges separate coverage. With the Guide's stringent page limitations, separate VHF range charts necessitated the elimination of the Civil Airways and Mileage Charts. Specific flight advisory and traffic control area boundaries and specific fix mileages, however, may still be found on the individual Guide Charts.

It is hoped that the mileages tabulated above facilitate flight planning because the addition of small sector mileages is no longer necessary.

NOTICES TO AIRMEN
SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 20, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/gnd communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25,D.C. for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent In other words, a temporarily **closed airport is ordinarily of much more importance from a safety angle than is a new airport, and the aeronautical public should be told** about **it as expeditiously as possible.**

Notamizing **of advice covering a field unusable** because **of flood, or snow, a runway closed** because of construction, **or the erection of** a pole-line **in an** approach, **doesn't** necessitate **an** engineering background **on the** part of the reporter. Too, safety frequently necessitates the notamizing of such advice **before** an official **check can** be made On the other hand, advice covering permanent airport data changes, **such as a new** airport, or a lengthened landing strip, or an additional hangar, obviously doesn't **require** the same **expeditious** transmission to the aeronautical public, and the data may **be** checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately **advised** of hazardous conditions, reporters should utilize the CAA Airways Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's **Guide.**

USE OF AIRPORTS BY MILITARY AIRCRAFT: (1) AAF REGULATION 85-2: The attention of Army clearance personnel and of Army pilots is invited to the provisions of Section III, AAF Regulation 85-2 and AAF Regulation 85-2A, which state in part: "Except for those Army aircraft assigned to civil contractors or agencies under bailment contract, no Army aircraft will utilize civil airports which have not been leased, purchased, or where AP-4 or similar landing rights agreements have not been negotiated by the Government, except in case of emergency or in case of official business. Each instance of flights in AAF aircraft for official business will be covered by competent air force, major air command, or higher authority orders. Each instance of flights for official business in organic aircraft of the Army Ground Forces will be covered by written orders of the commander of the unit to which the aircraft is assigned. These written orders must designate the field of intended landing. Unauthorized use of such airports is a substantiating factor in claims for damage with accompanying requests to the Government to bear maintenance and repair costs or to provide Government equipment at such civil airports. Notation will be made by clearing authorities in Remarks section of AAF Form 23 that competent authority authorizes use of such fields and will be transmitted in Remarks Section of the flight plan as 'authorized flight'. **All** landings **by military aircraft** without competent written orders **on** inactive, **temporarily** inactive **Army airfields** and civilian airports, **except in case of emergency, will be limited** to the **ones identified** by letters "A, N, NG, **or P" in the Airman's Guide. It is the responsibility of the various air forces, major air commands and certain field activities under the direct control** of the Commanding **General, AAF, to prevent unauthorized use of airfields and airports** as **outlined in this** Regulation".

2. **"OFFICIAL** BUSINESS" within **the meaning of AAF Regulation 85-2 is interpreted as the necessity** for personnel **aboard an aircraft to contact personnel, units, or** organizations **at or near the airfield selected for landing for the purpose of conducting** transactions **in the service of, and in the interest of, the United States Government. This** does **not** include **the use of an airfield by transient aircraft for the purpose of obtaining** clearance, **service, or other items attendant with itinerant operations. Cross country** flights **for the purpose of maintaining flying proficiency are not considered to be official** business **within the meaning of this regulation.**

3. **POLICY OF ARMY USE OF TEMPORARILY INACTIVE AIRFIELDS: (a) Municipal airfields which have been used jointly by the Army Air Forces and civil interests** and **at which Army facilities are temporarily inactive but the civil facilities are still** active, **may continue to be used by military aircraft. No servicing other than that provided by commercial concerns will be available. Such airfields will be identified herein** (directory **section only) by the following notice: "ARMY TEMP INACTIVE - CIVIL FACS"** (b) **Temporarily inactive Army airfields used exclusively by the Army Air Forces** (either **owned or leased) or municipal airfields used jointly by the Army Air Forces with** civil **interests at which both Army and civil facilities are inactive will be available to** military **aircraft at the discretion of the Commanding Officer of the organization to which** the aircraft **is assigned. Such airfields will be identified herein (directory section only)** by **the following notice: "TEMP INACTIVE. NO FACS.". Above policy statement is not** to **be construed as countermanding any AAF Regulations or letters governing command** use **of municipal airports or Army airfields.**

4. **"CLOSED" ARMY AIRFIELDS: Under the provisions of AAF Regulation 60-23** or **under specific direction of the CG, AAF, from time to time certain airfields under the** jurisdiction **in whole or in part of the Army Air Forces will be listed as "CLOSED":** Such **as,** (a) Fields closed **to all transient traffic except on official business or in** emergency; (b) Fields **that have been declared surplus to the AAF and on which permits** have not been issued for **civil use or which have not been otherwise disposed of by WAA.** The listing "CLOSED" **will appear in the directory section only. Airfields so designated** will **be used on official business only under written orders in each case.**

CLEARANCE OF AAF AIRCRAFT: National Guard **Units are not authorized to** clear AAF aircraft. At bases occupied solely by National Guard, clearance for **AAF aircraft** will be obtained from **Flight** Service in accordance with provisions of paragraph **2,** AAF Regulation 60-22.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA - Morrison Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Morrison Field, Fla.,

✓ Indicates new or revised Special Notices

Washington National Airport, D.C., or Westover Field, Mass., CANADA - Great Falls AAF, Mont., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., Kelly Field, Tex., or Morrison Field, Florida. CARIBBEAN - Morrison Field, Fla., or Kelly Field, Tex. ENGLAND, GREENLAND, ICELAND, NOVA SCOTIA, NEWFOUNDLAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. (Note: Selfridge Field also will clear for Nova Scotia and Newfoundland). HAWAII - Fairfield-Suisun AAF, Calif.

PILOT PROCEDURES WITH FLIGHT SERVICE USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22. (2) Departure from non-AAF Bases: AAF aircraft departing from a non-AAF base will file a complete flight plan with, and when necessary, secure approval from, the nearest Flight Service center prior to take-off, or as outlined in AAF Regulation 60-22. Communications with a Flight Service center may be established by direct telephone or by a radio call to the nearest AAF base or AACS airways radio station. After contacting the Flight Service center, and obtaining flight plan approval when necessary, pilots contemplating flight under IFR will secure a CAA Airway Traffic Control clearance. The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA communications facilities are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an AACS airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change of route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service. One position report each 30 minutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions, pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service advisories. (7) Voice Calls: AACS airways radio stations will be called by the location name followed by the word "airways", such as "Bolling Airways". This is distinct from the CAA radio call system which uses the location name followed by the word "radio", such as "Washington Radio". (8) RON Messages: At bases not connected with Flight Service centers by military interphone, pilots may file RON messages via long distance telephone to the Flight Service center at the time the arrival report is filed. (9) All VHF equipped aircraft will be provided with a card to be prominently mounted near the VHF control box which will specify button, frequency, and service obtainable. An Index of AACS airways stations within the U. S., together with a listing of the assigned frequencies, may be found on pages 100 & 101 of T.O. 08-15-1. The following table displays the channels and frequencies normally used to contact the various communication installations:

Button	Frequency	Service	
A	116.1 mcs.	CAA AIRWAYS (RANGE STATIONS)	* AACS Airways
B	126.18 mcs.	CONTROL TOWERS	(Plan 62)
C	137.88 mcs.	AACS AIRWAYS (PLAN 62)	* Control Towers
D	140.58 mcs.	MILITARY EMERGENCY & GCA FINAL APPROACH CONTROL	

* Available for service indicated on a secondary basis.

(10) It will be some time before all AAF aircraft are equipped for operation on AACS airways frequencies. It is not the intent that pilots flying aircraft not so equipped attempt to make position reports to Flight Service as described above. Emergency Flight Service advisories, however, may be transmitted to such aircraft on the AAF control tower frequency. Aircraft which are equipped for operation on AACS airways frequencies will contact airways station whenever possible rather than AAF control towers. (11) The following list of telephone numbers will be used for contacting military Flight Service Centers:

CAA AREA	FLIGHT SERVICE AREA	PHONE NO.
Washington; Pittsburgh; New York; Boston	Olmsted Flight Service Center Middletown, Penna.	Steelton 93387 Steelton 93470
Jacksonville; Miami	MacDill Flight Service Center Tampa, Fla.	Tampa H-4871
Memphis; New Orleans; Atlanta .	Maxwell Flight Service Center Montgomery, Ala.	Montgomery LD 89
Cleveland; Cincinnati; Detroit;Chicago;St. Louis	Wright Flight Service Center Dayton, Ohio	Osborn 88691 Osborn 88692
Ft. Worth; San Antonio; part of El Paso	Ft. Worth Flight Service Center** Fort Worth, Tex.	Fort Worth 77251
Denver; Minneapolis; Kansas City	Lowry Flight Service Center Denver, Colo.	Denver LD 116 LD 117
Los Angeles;Albuquerque; part of El Paso	March Flight Service Center** Riverside, Calif.	Riverside 7107 Riverside 7108
Oakland; Salt Lake	Hamilton Flight Service Center Hamilton Field, Calif.	San Rafael 770 San Rafael LD-20
Great Falls;Seattle	McChord Flight Service Center Tacoma, Washington	Tacoma LD-20 Tacoma LD-21

**REVISION OF ARMY FLIGHT SERVICE CENTER AREAS: The boundary between the March and Fort Worth Flight Service Areas has been moved. That part of the El Paso CAA area lying E of the following points now falls within the Fort Worth Flight Service Area; that part lying W within the March Flight Service Area: From 25 miles SE of the Clarendon Range, thence SSW to lat. 33°, long. 101°35', thence W to 33°-104°, thence S to 31°-104°, thence W to the U.S.-Mexican Border at 31°-105°34'

IFR CLEARANCE OF ARMY AIRCRAFT: Except as outlined below, no Army aircraft will be cleared for instrument flight unless such aircraft is equipped with a low frequency radio receiver capable of reception in the 200 to 400 kc. band. The BC-1206 (Detrola) receiver is not considered adequate as regards compliance with this directive. Aircraft not so equipped may be permitted to clear under IFR when the instrument type clearance is necessitated by reduced local visibility caused by fog, smoke, or haze, or when the flight will not be conducted under conditions which will require navigation by radio.

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with AAF Letter 63-9 of April 24, 1947, the following instructions will govern the clearance of AAF aircraft to and from the New York City Area (encompassed by a 25-mile radius from the southern tip of Manhattan).

(A) FLIGHTS INTO THE AREA: AAF aircraft flying into the area may be cleared for any authorized field therein, but will in all cases secure in-flight approval from Flight Service by contacting Mitchel Airways prior to proceeding to the field of destination. AAF Form 23 will indicate a flight plan to the field of destination via Mitchel Fld. Mitchel Airways will secure Flight Service approval of further clearance to other fields in the area under the conditions listed below only. If further clearance is refused, aircraft will land at Mitchel Field or at any other authorized field outside the area.
(1) CFR. When the ceiling is at least 2000' and the visibility is 3 miles or more.
(2) IFR (a)When the visibility is not less than 1 mile and the ceiling is unlimited. (b) When the visibility is not less than 2 miles and the ceiling is not less than 5000'.

(B) FLIGHTS OUT OF THE AREA: AAF aircraft departing from the area from fields other than Mitchel will be cleared subject to the conditions listed above for CFR and IFR clearances.

AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempted from the above restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A, N, NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS:

Following are Army assignments:

Channel	Frequencies
A	116.1
B	126.18
C	137.88
D	140.58
G	137.70
H	134.10
U	108.3
V	108.7
W	109.1

Following are Navy assignments:

Channel	Frequencies
1	116.1
2	142.56
3	126.18
4	128.70
5	143.28
6	134.64
7	143.64
8	142.02
9	142.74
GUARD	140.58

ARMY DISTRESS, AND SEARCH AND RESCUE PROCEDURE: 1. When an aircraft is in distress and the pilot is unable to establish two-way communication on any frequency, he will transmit as follows: "Mayday. Mayday. Mayday. This is Army 1 2 3 4, this is Army 1 2 3 4, this is Army 1 2 3 4, my approximate position is --, Over." Pilot may follow this emergency transmission with any other information he deems necessary. Although Channel "D" (140.58 mcs) has been designated as the Joint Army-Navy emergency frequency, the pilot in distress will use any or all frequencies at his disposal. Communication coverage on various frequencies will vary depending upon the location of control tower, airways, VHF/DF, and other radio stations. 2. To request escort by Air Rescue Service rescue plane when two-way communication can be established, aircraft in distress will: (a) Contact Flight Service through nearest AACS airways station. (b) Give position report; if position is not known, request QTF (Fix). (c) Give nature of trouble, also estimated time plane can remain aloft. (d) Follow instructions transmitted by Flight Service. (e) Follow instructions of Air Rescue Service aircraft after contact is accomplished. 3. To report sighting of crashed aircraft: (Note: Previously reported and identified crashes are marked with yellow paint). (a) Contact Flight Service through nearest AACS airways station. (b) Give position of crash. (c) Evidence of survivors, type and number of aircraft (if possible). (d) Follow instructions transmitted by Flight Service. (e) Immediately after landing make a complete report for transmission to the nearest Air Rescue Unit; also notify nearest Army Air Forces installation.

SERVICING FOR ARMY AIRCRAFT: Transient Army servicing is usually available at active Army airfields and, when available, is indicated in the remarks column, data section by an "S" designation (as defined under data legend) and octane ratings of gas are shown. At airports designated by a single (A) in the "Airman's Guide" (Joint use with civil interests), Army servicing is available unless remarks column carries "ARMY TEMP INACT-CIVIL FACS." Notation is given in remarks column to servicing available for military aircraft: for example, "91, 100 oct. Army" This may be contract service. As a matter of policy, limited servicing and maintenance will be available to transient military aircraft at Air National Guard Fields (on Form 15). Notation with regard to available facilities will be shown in the remarks column; for example, "91,100 oct. NG". At (P) or civil fields, military servicing or Army contract fuel will not be available; servicing may be secured in emergency only on a Form 15. Army servicing may be procured at Navy fields on a Form 15.

GROUND/AIR EMERGENCY CODE: The attention of all Army base operations personnel and Army pilots is invited to WD pamphlet 11-7, subject "Gnd/Air Emergency Code"

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

OLD PILOT CERTIFICATES MUST BE EXCHANGED: All pilot certificates issued prior to July 1, 1945, will expire July 1, 1947. Such certificates may be exchanged for new-type certificates at any time prior to their expiration date.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum. (5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize. (See pages 144, 145, 146 for VHF range coverage).

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 mcs. and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs. for

transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications station program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs. in addition to towers' low frequencies. See individual data pages in the Airman's Guide for inclusion of these frequencies as commissioned.

U. S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

NON-COMPULSORY REPORTING POINTS: (1) The intersection of the NW leg of Waco Radio Range and the W leg of Fort Worth Radio Range has been designated a non-compulsory reporting point known as "Strawn". (2) The intersection of the NW leg of Waco Radio Range and the W leg of Dallas Radio Range has been designated a non-compulsory reporting point known as "Gordon". (3) The intersection of the S leg of Ft. Worth Radio Range and the W leg of Dallas Radio Range has been designated a non-compulsory reporting point known as "Fort Worth"

CFR FLIGHT PLANS, AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct "TO-08-15-1", May 25, 1947, page 97, by deleting FCC station at South Miami, Fla., and by showing instead, station at Richmond, Fla. (temp inop due to pending move), telephone number Perrine-2921; by correcting back-page Index to Radio Facility Charts to show Atlanta Chart as 51 and Miami Chart as 53; page 32, by showing control tower at Casper with VHF channel B.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Effective Date
Powell, Wyoming	Supplementary	Established
Lovell, Wyoming	Supplementary	Established
Evanston, Wyoming	Supplementary	Established

NOTE: Hourly reports now available from Ontario, Oregon in lieu of supplementary weather reports.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with 2-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off. (b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest or Manual 60). (c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

FOREIGN DATA

SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume 1, No. 2, dated January 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom military air bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the United States or the United Kingdom and are in ferry status: (a) For regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana; (b) For alternate

use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad. Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

CAUTION ADVISED IN USE OF GUATEMALA-HONDURAS AREA AERONAUTICAL CHARTS: Flight checks have revealed that elevations indicated on Gulf of Fonseca (710) Aeronautical Chart covering the Guatemala-Honduras-Nicaragua Area, dated Dec. 1946, are as much as 4300 feet too low. This chart base is being thoroughly re-checked and a new chart will be issued as soon as possible.

TRANSMISSION OF INTERNATIONAL NOTAMS: Effective May 10, 1947, the transmission of international notams to Service A circuits by WSY New York was discontinued. Offices desiring receipt of this material should obtain receiving drops on the Service O system.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagnes, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; EIP Shannon; FXO Paris; WFH Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

AFRICA-Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

BERMUDA-Somerset NAS Radio Facility: Somerset NAS transmissions, air ground CW 3285 and 6253 kcs., were discontinued April 3, 1947.

BRITISH WEST INDIES-Antigua NAF: The following red obstruction lights have been discontinued at Antigua NAF. Aircraft utility building height 50' two lights. Main supply building height 60' one light. Power house height 40' one light. The following red obstruction lights will be discontinued at sunrise June 1, 1947. Three obstruction lights on water tower, two at 75' level and one at 155' level.

Belize, Honduras-Landing of Private Aircraft in Belize, Honduras: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, Honduras, at least four hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z thru MIAMI CAA operated, overseas foreign aeronautical communications station.

Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Station - call letters MRX. Flight plans also must be filed for all flights departing from U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters WBR, or New Orleans-call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 2870, 3105. and 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file Flight Plans from point of departure to the Communication Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs. A3emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA operated Overseas Foreign Aeronautical Communications Station, WBR, Miami.

Trinidad Naval Air Station, B.W.I.: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun., until further notice. Surface craft and aircraft remain clear of area 1000N, 6045W, 1030N 6045W and 1000N. 6000W, 1030N, 6000W.

CUBA-Rancho Boyeros Airport, Havana: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file flight plans prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type; route of flight; time of flight departure; time of minutes; altitude; CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

GREECE-Hassani Airport, Athens Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

MEXICO-Mexican Entry Fees: At Mexican Airports of Entry, charges include an overtime fee of 30 pesos after 12 noon for Immigration Inspection and a fee based on a full day's wage for each inspector involved for each 3 hours of overtime or fraction thereof after 2 P.M. for a Customs inspection. Charges may also be made for a Customs guard to watch the plane and for the taxi fare to bring inspectors to the field after 12 noon. In American money total fees may approximate $15 to $20.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

PUERTO RICO-San Juan Pre-Flight Clearances: San Juan Civil Air Terminal (U.S. Naval Air Station) Isla Grande Airport, San Juan, P.R. - All civil operations at San Juan Air Terminal were assumed by the Puerto Rico Transportation Authority effective March 4, 1947. Authority must be obtained for landings at this airport prior to the commencement of any flight. Address requests to Airports Division, Box 3508, San Juan, P.R. Cable address is "Autoritan"

San Juan, P.R.: Effective June 9, 1947, the seadrome landing lights were discontinued and the landing light buoys were removed from the bay of San Juan at the Naval Air Station, San Juan, P.R.

San Juan, Caguas: Radio antenna tower under construction unlighted until further notice, height 150', located 1-1/4 miles N of Caguas at latitude 18-15-20 N, longitude 66-1-53 W.

San Juan, Losey Field: May 1, 1947, Puerto Rico Transportation Authority took over the operation of Losey Field at Ponce. Operations at this field are restricted except in emergency to the southernmost 150' of the E/W runway - several bad holes on the northern half. NW/SE runway closed. Field available to daylight CFR operations only. (4-25).

San Juan NAS: Effective June 21, 1947, repairs to runway in progress. Runway will be restored to normal length of 5330 feet.

ALEXANDRIA ARPT-NW/SE rnwy lgtd until 2100 every ngt for 1000'. Approx 1500' of AGA reflectors extending beyond the lgts. Model Airplane Meet will be held July 20th between 1000 and 1700. Trans traffic should exercise due ctn. (5-28)
**ALTAVISTA ARPT-Lat. 37-09-00, long 79-12-15. See page 94. 200' NE end of fld unusable in wet weather. (2-4)
BLACKSTONE ARPT-Tetrahedron inop, unlgtd. NE/SW rnwy avail. full length and 250' wide from NW side of NE/SW rnwy. 5 and 7'' rised of concrete 24' wide at seams on SE side NE/SW rnwy, mrkd. 5'' rise lctd 450' NE and 7'' rise lctd 75' SW of intersection NE/SW and NW/SE rnwys. (6-17)
★BYRD FLD (RICHMOND)-RADIO: June 9, middle and outer mrkrs decomm. Middle mrkr will be relctd 0.68 mi from SW end of NE/SW rnwy. Concurrently with this relctn compass lctrs will be installed at outer and middle mrkr sites. Lclzr will remain in oper. (6-9) Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-3) FLD: Ltd Army svcg facs. Avoid using 1000' rnwy extns. Rnwy, taxiway shoulders soft. Acft landing this fld without establishing rdo commun with twr watch carefully for lgt gun signals-twr lctd in center of triangle of rnwys. (2-18)
CENTRAL ARPT (RICHMOND)-During wet weather use strips only. (1-2).
CHINCOTEAGUE NAAS-Closed 1700 to 0800 except on req with 2 hrs notice. Bcn operates all ngt except during local ngt flying with CFR conditions. Bcn turned on during ngt flying in emerg or on req. IFR flight plans accepted only 0800 to 1630 Mon thru Fri except on holidays and on 2 hrs notice. Fld lighting sys under rprs unreliable. Use rnwys, taxi strips only - soft shoulders and trenches along sides of rnwys and taxi strips. Equip. on fld. Pilotless rdo-controlled acft operating days Mon thru Fri. Other acft in vcnty proceed with ctn. (2-28)
DAHLGREN NAF PROVING GROUNDS-CLOSED TO ALL (INCLUDING TRANS MIL) ACFT EXCEPT THOSE ON OFF. BUS. OR IN EMERG. Except in emerg or on req (with two hrs notice) fld open only 0730 to 1615 Mon thru Fri inclusive. Off. flights must be cleared thru one of the following: NAS Anacostia, D.C; NAS Patuxent River, Md.; NAS Norfolk, Va.; NAS Quonset Point, R.I.; Cape May CGAS, N.J.; Inyokern NAF, Calif.; NAF Torpedo Stn, Newport, R.I.; Naval Acft Factory Philadelphia, Pa.; Cherry Point MCAS, N.C.; Quantico MCAS, Va; AAF Proving Gnds, Eglin Fld, Valpariso, Fla; Langley Fla,Va.; Wright Fld, Dayton, Ohio; Aberdeen Proving Gnd, Aberdeen, Md.; Lakehurst NAS, N.J. (3-10)
DANVILLE ARPT-Rnwy lgts will be operated by INSAC personnel 0800 to 2400. From 2400 to 0800 lgts will be unattended and rnwy nearest in line with wind direction at 2400 will be lgtd. Grassy plots soft when wet, rough when dry. Use only hard surfaced rnwys and taxi strips. Tetrahedron free swinging.(5-26)

[redacted]EMPORIA ARPT-Fixed tee, wind sock E side fld indicating rnwy in usd. (12-28)
FENTRESS NAAS-Use in emerg only (caretaker status - no facs) (2-19)
HARCUM ARPT-Use NE/SW strip only between yellow cone mrkrs. (3-31)
HOPEWELL ARPT-NE/SW and NW/SE strips under const. (3-21)
LANGLEY FLD-RADIO: Effect Apr 25, oper of AACS operated HF/DF stn temp suspended until further notice. (4-24) FLD: Rnwy 2-20 closed. Rwy 12-30 closed to all 4-engine acft. (1-14)
LOVING FLD, SITE 35A, NA-WA (PULASKI)-Observe right traffic for landings from SW on NE/SW rnwy. (4-4)
LYNCHBURG-RADIO: At intermittent periods especially during dry weather rcvg watches on high freqs impaired by pwr noises. (6-17)
MONOGRAM NAAS (DRIVERS)-Use in emerg only (Caretaker status-no facs.) (2-19)
MT. VERNON-See Special Notice under District of Columbia.
NORFOLK-RADIO: VHF rng on 108.7 mcs. shut down for an indefinite period. (5-8)
NORFOLK NAS-EAST FLD-Pilots on S-bound coastal flights inbound IFR between 0700-2400 to NAS Norfolk shall establish rdo ctc with Navy Chincoteague Rdo for further clearance instructions from ATC Norfolk. Pilots on N-bound coastal flights inbound IFR between 0700-1900 to NAS Norfolk shall establish ctc with Navy Weeksville Rdo for further clearance instructions from ATC Norfolk. Pilots on either S-bound or N-bound coastal flights inbound IFR to NAS Norfolk at other than the above stated hrs ctc Norfolk Rdo or Navy Norfolk Twr earliest possible for further clearance instructions. (3-18)
OCEANA NAAS-Facs avail. 0800 to 1630 Mon thru Fri. Acft clearances not accepted at other than designated hrs. Emerg acft clearances accepted any time upon prior notification. Equip. on fld. (6-13)
ORANGE CO. ARPT-Strips muddy in wet weather. (4-4)
PENINSULA ARPT (HAMPTON)-Right traffic whenever wind conditions require take-offs and landing toward SW (Newport News). Left hand pattern when wind conditions require take-off and landing to NE (Hampton). Traffic direction and pattern indicated by T on roof of hangar (5-19).
PRESTON GLENN ARPT (LYNCHBURG)-RADIO: At intermittent periods especially during dry weather rcvg watches on high freqs impaired by pwr noises. (6-17). Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic.(5-8) FLD: Use only rnwys during and after wet weather. Two poles 4200' E of E/W rnwy. (2-7).
QUANTICO MCAS-Closed sunset to sunrise except in emerg. (5-6)
RICHMOND-Elko Aux Fld 5 mi E of Byrd Fld is similar in design and layout to Byrd Fld, BUT RNWYS ARE UNSUITABLE FOR LANDING BY ACFT OF ANY TYPE. Care should be taken not to confuse the two flds.
SHENANDOAH ARPT-N/S strip under const. Grading equip. on fld. Soft in wet weather. NE/SW strip mrkd by cone mrkrs. (3-15)
SOUTH NORFOLK ARPT-Lat 36-46-00, long 76-15-30.
UNIVERSITY OF VIRGINIA ARPT (CHARLOTTESVILLE)-Ctn on E/W strip in wet weather. (3-17)
WINCHESTER ARPT-E end E/W strip rough. Contact Front Royal Radio or circle fld before landing. (3-7)
WOODRUM FLD (ROANOKE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-10) FLD: Ext. local traffic days. Acft landing without establishing rdo commun with twr must conform to local traffic patterns. Observe twr at all times for lgt gun signals especially on base leg and final approach. Clear rnwy immediately after landing. Mil acft utilizing VHF freq. should listen for control twr instructions or observe lgt signals from twr in response to their transmissions. All acft departing should determine proper rnwy and taxi route from twr or operations prior to taxiing. (2-28)
[redacted]: SPECIAL NOTICE-Benton Co. Danger Area approx 12 mi NW of Pasco is particularly hazardous-all flights avoid. (See Spokane Flight Planning Chart #3, Spokane Sectional, and Washington 5 Danger Area Charts).
ARLINGTON AERONAUTICAL SCHOOL ARPT-Unmrkd cable span being erected [redacted] mi E (78° true). Cable will run N/S between lat 48-13, long 121-55, on Wheeler Mtn and lat 48-11-30, long 121-55-00 on Blue Mtn. Cable anchorage levels at approx 2800' on both Mtns and will be approx 1000' above valley floor. Vertical-down-haul will be attached at mid-span terminating at the ground in Jim Creek Valley. Bcn inop. (4-25)
BARRY'S SKYHARBOR ARPT (TACOMA)-Right traffic, W take-offs and landings. (3-17)
BELLEVUE AIRFLD (SEATTLE)-Right traffic when landing to S. (3-19)
BELLINGHAM ARPT-Do not taxi off surfaced areas-sodded portions soft. Day traffic controlled by white T center of arpt (6-20)
BOEING FLD (SEATTLE)-Daylgt CFR opers-lgt acft use mrkd dirt landing strip E. side fld adj to main rnwy. Traffic patterns made to E at 1000'. Right traffic when taking off to NE. Flash. amber lgt on twr indicates right pattern in relation to dirt landing strip. All turns, taxiing off or back on dirt area made toward twr. Acft using dirt strip avoid flying over main rnwy or approaches. Watch for air and ground traffic. Lgt gun signals for take-offs and final approaches only. Heavy acft use rnwys, taxi strips. Equip. on fld. All unscheduled acft landing at Boeing Fld must register with County Fld Office, except those who have made other arrangements with fld management. Equip. S of Admin Bldg loading ramp, avoid flagged area. Holes E side main taxiway, N and S of Admin Bldg. (4-4)
BUENA ARPT-Right traffic E take-offs and landings. (3-17)
CLE ELUM ARPT-Right traffic E takeoffs and landings. (3-17)
COUNTY-CITY ARPT (PORT TOWNSEND)-Right traffic E takeoffs and landings.
COUPEVILLE OLF-Closed except in emerg.
FELTS FLD (SPOKANE)-Lgt non-rdo equipped acft use mrkd graded area S of main rnwy. Fancher Bcn near Felts Fld inop. Take-off and land on sod area before reaching taxiway near center of fld. N side rnwy mrkd. Equip. on fld. (4-22)
★EVERETT-RADIO: Overseas Foreign Aeronautical Communs Stn point to point radiotelegraph circuit 300X transmitting on 168,4070,8130,11331,16 232.5 kcs; 8010 kcs avail. on req. AIRWAY MILEAGES 148

NOTICES TO AIRMEN 149

GUIDE CONTENTS

THE AIRMAN'S GUIDE IS A COMPOSITE DIRECTORY OF AIRPORTS, AIR NAVIGATION RADIO AIDS, AND NOTICES TO AIRMEN. ON THE DATA PAGES ARE TABULATED ALL THE DATA COVERING THE FACILITIES CHARTED ON THE BACKING PAGES. THIS PRESENTATION IS GRADUALLY BEING REVISED, HOWEVER, SO THAT EVENTUALLY THE DATA PAGES WILL FACE THE CHARTS.

INDEX OF FACILITIES

TO FIND THE NUMBER OF THE PAGE ON WHICH A FACILITY IS CHARTED, REFER TO THE INDEX OF FACILITIES BELOW. AS OUTLINED ABOVE, THE DETAILED DATA FOR THE FACILITY WILL BE FOUND ON THE DATA PAGE BACKING, OR FACING, THE CHART.

NEW DATA PRESENTATION

(A) ON THE DATA PAGES BACKING OR FACING THE CHARTS, NEW DATA OR REVISIONS ARE INDICATED BY ARROWS; (B) IN THE NOTICES TO AIRMEN SECTION, CITATIONS COVERING NEW OR REVISED RADIO DATA ARE PREFIXED BY ONE LARGE STAR " ★ " CITATIONS COVERING NEW OR REVISED AIRPORT, OR MISCELLANEOUS DATA ARE PREFIXED BY TWO ASTERISKS "**"

DATA PAGE NOTAMS

BECAUSE OF THE SERIOUS PAPER SHORTAGE, THE DATA PAGES, WHERE POSSIBLE, HAVE TO SERVE AS NOTAM (NOTICES TO AIRMEN) PAGES, RESULTANTLY, MOST OF THE NEW DATA FORMERLY NOTAMIZED IN THE NOTICES TO AIRMEN SECTION WITH PREFIXED LARGE STARS OR DOUBLE ASTERISKS ARE NO LONGER CARRIED IN THAT SECTION. ONLY COMMISSIONINGS, ABANDONMENTS, OR CHANGES SO POTENTIALLY HAZARDOUS THAT THEY ARE INDICATED WITH Ⓡ (FOR RED FLAG) SYMBOLS ON THE CHARTS, ARE NOW CITED IN THE NOTICES TO AIRMEN SECTION NOTAMIZING ON THE DATA PAGES IS EFFECTED BY THE USE OF PREFIXED ARROWS AS IN THE FORMER AIR NAVIGATION RADIO AIDS PUBLICATION. ANY CHANGES FROM THE PREVIOUS ISSUE, WHETHER CITED IN THE NOTICES TO AIRMEN SECTION, OR NOT, ARE INDICATED BY THE PREFIXED ARROWS. FOLLOWING ARE EXAMPLES OF CHANGES NOTAMIZED ONLY ON THE DATA PAGES: FIELD OBSTRUCTION, SERVICING, ELEVATION, LOCATION, AND RUNWAY LENGTH CHANGES. BECAUSE OF THE USE OF THE PREFIXED ARROWS AS NEW DATA INDICATORS, A FURTHER INNOVATION HAD TO BE ADOPTED. THIS IS A TINTED HORIZONTAL LINE FOLLOWING THE LAST TABULATED FACILITY AND TITLED EITHER NEW RADIO FACILITIES OR NEW AIRPORTS.

HOW TO USE THE AIRMAN'S GUIDE

NEW FACILITIES ON DATA PAGES

SPACE BELOW THE TINTED HORIZONTAL LINES ON THE DATA PAGES HAS BEEN RESERVED AS A SUPPLEMENT FOR NEW RADIO AIDS AND AIRPORTS WHOSE DATA WERE RECEIVED AFTER THE DATA PAGES WERE ORIGINALLY TYPED. REVISIONS TO EXISTING AIRPORTS AND RADIO AIDS ARE SUPER-IMPOSED ON THE OLD DATA. NEW AIRPORTS AND RADIO AIDS HOWEVER, ARE LISTED, NECESSARILY OUT OF ALPHABETICAL ALIGNMENT, BELOW THE TINTED HORIZONTAL LINES UNTIL THE PAGE IS RE-TYPED.

CHART NOTAMS

NOTAMIZING ON THE CHARTS IS EFFECTED BY USE OF THE SUPER-IMPOSED Ⓡ AND Ⓞ SYMBOLS. THE Ⓡ (FOR RED FLAG) INDICATES A VERY HAZARDOUS CONDITION OR A MAJOR CHANGE. THE Ⓞ SYMBOL (FOR ORANGE FLAG) INDICATES A MINOR CHANGE OR HAZARDOUS CONDITION WITH THE FACILITY STILL USABLE WITH CAUTION. THE PERTINENT DETAILS TO WHICH THESE SYMBOLS REFER WILL BE FOUND LISTED IN THE NOTICES TO AIRMEN SECTION UNDER THE FACILITY NAME (AND STATE) BY WHICH THEY ARE CHARTED.

Ⓡ and Ⓞ SYMBOLS

THESE SYMBOLS WERE ADOPTED FOR SUPER-IMPOSITION OVER CHARTED FACILITIES TO INDICATE HAZARDOUS CONDITIONS AND COVERING NOTICES TO AIRMEN. THUS, IF A CHART USER NOTES NO SYMBOL ON THE FACILITIES HE IS PLANNING ON USING, THERE IS NO NECESSITY FOR HIM TO WADE THROUGH THE 30-ODD PAGE NOTICES TO AIRMEN SECTION

NOTICES TO AIRMEN SECTION

ALL TEMPORARY CONDITIONS (FIELD SOFT, RUNWAY UNDER CONSTRUCTION, RANGE COURSE OUT OF ALIGNMENT, ETC) ARE CITED IN FULL IN THE NOTICES TO AIRMEN SECTION UNTIL THEY ARE NO LONGER IN EFFECT. WHEN A CITATION CARRIES A PERMANENT ITEM AND A TEMPORARY ITEM, THE PERMANENT ITEM IS UNDERLINED. PARENTHETICAL DATE AT END OF ITEM INDICATES TIME ITEM WAS REPORTED. TO CONFORM TO CHART PRACTICE, ALL FACILITY DATA ARE LISTED IN THE NOTICES TO AIRMEN SECTION AND ON DATA PAGES ALPHABETICALLY BY STATES AND BY FACILITY NAME. THUS, AN AIRPORT WILL BE FOUND LISTED ALPHABETICALLY UNDER ITS OWN NAME RATHER THAN UNDER ITS LOCALE'S NAME. IF THE AIRPORT OR RADIO FACILITY NAME IS OTHER THAN THAT OF THE CITY IN WHICH IT IS LOCATED, THE LOCATION IS SHOWN IN PARENTHESIS AFTER THE FACILITY NAME.

SPECIAL NOTICES

NOTICES OF NATIONAL INTEREST, OF GREAT IMPORTANCE, OR OF NON-LOCALIZED NATURE, WILL BE FOUND AT THE BEGINNING OF THE NOTICES TO AIRMEN SECTION.

CIVIL FACILITY CHANGES: ADVISE WHOM

PLEASE ADVISE THE OFFICE OF AVIATION INFORMATION, ATTENTION A-250, C.A.A., DEPARTMENT OF COMMERCE, WASHINGTON 25, D.C. AS SOON AS TEMPORARY CONDITIONS COVERING CIVIL AIRPORTS OR NAVIGATIONAL AIDS BEGIN OR TERMINATE, OR FLIGHT HAZARDS ARE ERECTED OR REMOVED. FIELD DATA REVISIONS SHOULD BE SUBMITTED TO THE NEAREST C.A.A. DISTRICT AIRPORT ENGINEER.

TO ALL SUBMITTERS OF AIRMAN'S GUIDE DATA

AN UNDER-MANNED STAFF PREVENTS AN INDIVIDUAL ACKNOWLEDGMENT OF DATA SUBMITTED FOR THE AIRMAN'S GUIDE BY TELEGRAM, TELETYPE DISPATCH, OR LETTER. YOUR COOPERATION IN PERMITTING A GUIDE CITATION TO SUFFICE AS AN ACKNOWLEDGMENT WILL BE APPRECIATED.

INDEX OF FACILITIES

LEGEND

A - AIRPORT WITH AN ASSOCIATED RADIO FACILITY IDENTICALLY NAMED
FM - FAN MARKER
H - NON-DIRECTIONAL RADIO BEACON
R - RADIO RANGE
T - AIRPORT WITH CONTROL TOWER

N.B. ALL FACILITIES WITHOUT A LETTER SUFFIX ARE AIRPORTS. NAMES NOT FOLLOWED BY A NUMBER SUFFIX ARE NOT AIRPORTS BUT MERELY GEOGRAPHICAL LOCATIONS.
